Jordan Challenges Reagan Israel on Peace Talks Discloses **Arms Plan**

By Glenn Frankel

TERUSALEM — Jordan's prime ister, formally announcing that Wis country has agreed to particiference, has challenged Israel's divided coalition government to decide whether it is willing to at-

The statement followed reports from Israel that King Hussein of Jordan and Foreign Minister Shi-mon Peres of Israel have, through U.S. mediation efforts, reached some agreement on guidelines for holding such a conference.

The announcement Sunday night by Prime Minister Zaid al-Rifai of Jordan left uncertain whether the Palestine Liberation Organization would play a role in the proposed conference.

Mr. Rifai said the PLO should

attend as part of a joint Jordanian-Palestinian delegation. But he stip-glated that the organization renounce terrorism and accept two United Nations Security Council resolutions that imply recognition of Israel's right to exist within se-

Senator Says Reagan Knew **Money Was** For Contras

By David E. Rosenbaum New York Times Service

WASHINGTON - Daniel K Inouye, chairman of the Senate committee investigating the Iran-contra affair, says he believes President Ronald Reagan knew money was being raised to buy weapons for the rebels in Nicaragua.

Mr. Reagan, responding to Senator Inouye's comments Sunday. said the senator was mistaken. The Democrat from Hawaii has spent months studying the evidence prepared for the Iran-contra hearings, which begin Tuesday, and his remarks were the first by someone with such first-hand knowledge to suggest the president knew money was solicited for the rebels for anything other than humanitarian purposes.

The statements also suggested that Mr. Reagan might have known of illegal activities.

In an interview on television, Senator Inouye said, "The president was aware that monies were being raised to supply arms to the

He also said, "I think the president knew much more than what the White House has intimated."

But after the broadcast, he appeared to modify his remarks. When he was asked whether Mr. Reagan knew money was being raised specifically for military aid. the senator said, "There's no documentary evidence at this moment."

Mr. Reagan, who said he saw the sales to Iran and the diversion of broadcast, said: "With regard to profits to the Nicaraguan rebels. whether private individuals were giving money to support the contras, yes, I was aware there were people doing that. But there was nothing in the nature of a solicita-

Coalition In Lebanon

BEIRUT - Prime Minister Rashid Karami announced his resig-nation Monday as head of a 10unity that was formed three years ago, with Syria's backing in an effort to end Lebanon's 12-year-

old civil war.
"I am convinced that all that is happening runs against the interest of the Lebanese and Lebanon in general," Mr. Karami said after attending a weekly security committee meeting. "It has become my duty to take a position that would be for the benefit of this country, so announce my resignation."

Under the constitution, the resignation of the government follows automatically after the president accepts the resignation of the prime

There was no immediate reaction from President Amin Gemayei, a Maronite Christian. Mr. Karami, a Sunni Moslem, and his Moslem cabinet colleagues have boycomed Mr. Gemayel since January 1986, when the president would not endorse a Syrian-backed peace plan for Lebanon.

Two weeks ago, Mr. Karami and for the first time in seven months to discuss measures to alleviate the continuing economic crisis. The ese pound has declined in value by about 28 percent this year

to about 116 to the dollar. Mr. Karami took office on April 30, 1984. The national unity cabi-net was seen at the time as the last chance for Lebanon's Christian and Moslem factions to find a way to end the civil war.

WORLD BRIEFS

Another Minister Resigns in India

NEW DELHI (AP) — Prime Minister Rajiv Gandhi's minister for program implementation, A.B.A. Ghani Khan Choudhury, submitted his resignation Monday after an audit by Parliament linked him to a

questionable land deal.

Mr. Chondhury, 59, sent his letter of resignation to Mr. Gandhi and it was accepted by President Zail Singh on behalf of Mr. Gandhi, the United News of India reported. He was the third minister to resign in the

past month, reducing the cabinet to 15 members.

Defense Minister V.P. Singh stepped down last month after ordering an investigation of European arms deals. Law Minister Ashoke Sen also left, taking responsibility for the poor showing by Mr. Gandhi's Congress (I) Party in March elections.

company's factory near Frankfurt.

The investigation centers on Otto
Heilingbrunner, a director of the MOSCOW (Renters) — The Soviet Communist Party newspaper Pravda accused France on Monday of seeking to draw out West Europe. an discussions on missiles to prevent nuclear arms control agreements. It urged Paris to end its "old thinking" in wanting to keep its nuclear strike force and said it should recognize that French nuclear missiles, which are not considered in the current East-West arms talks, would eventually have to be included.

The comments followed talks between Prime Minister Jacques Chirac of France and Chancellor Helmut Kohl of West Germany on Sunday. Both nations said that more consultations were needed with their Europe-an allies before they could reach a position on the latest Soviet offer to cut U.S. and Soviet nuclear missiles.

Tunisia Holds Suspected Iran Loyalists

TUNIS (AP) — The Tunisian anthorities have arrested several businessmen who were said to have contributed funds to Islamic fundamentalists loyal to Iran. The arrests were part of the government's crackdown on extremists following a decision in March to break diplomatic relations with Tehran, officials said.

Government sources who revealed the Saturday arrests would not say how many businessmen had been detained. They said investigators were trying to determine if the contributions were for charity or were donations of a more political nature.

The government has carried out a series of arrests in recent weeks involving students, unionists, businessmen and others after determining what it said was a concerted effort by the Iranian Embassy to destabilize

Yugoslav Paper Criticizes Regionalism

BELGRADE (Reuters) — Yugoslavia's collective state presidency has called for greater central control to curb growing nationalism and narrow

regional interests, the Belgrade daily Politika said Monday.

The newspaper said a report by the nine members of the state presidency to parliament acknowledged that nationalism and regionalism had taken precedence over the country's interests and were hampering the federal government's actions.

The report recommended constitutional changes reducing the decisionmaking powers of Yugoslavia's six republics and two autonomous prov-inces and strengthening those of the federal government, Politika said. Conflicting regional interests, it said, had blocked operations at the federal level, led to disintegration of the Yugoslav economy and fueled nationalist sentiment in Yugoslavia with its many ethnic cultures.

When it comes to private jets, one show sets the standard.

And one plane meets it.

See the Falcons at the Paris Air Show. June 11th / 21st 1987.

The Parls Air Show 7 It's where the elite decision makers in the aircraft field gather to face the manufacturers, highlight the winners, and set the trends. Where creators plan the aircraft of tomorrow. And buyers make it what it is today. If you believe that a plane has to be one of the most outstanding achievements of our time, a balance of technology, science and beauty, a harmony between high performance and extreme safety, you will be at the

FALCON Display.
The widebody FALCON 900 is the most accomplished of large business jets: the only one built with the computer technology used for Mach 2+ fighter jets; the only one to do without stick pushers, stick pullers, stick shakers etc... required by most other jets; the only one to offer three engine safety, the

only one with no flight restrictions to

cross oceans and deserts.

Today's business jet operating community, major corporations and governments, know what DASSAULT's name stands for. Yet the FALCON 900 has redefined the limits of what a modern-day, large-cabin business jet should be. The heir of the most sophisticated engineering and aerodynamics in both the civil and military aviation spheres, FALCON 900 sets new standards of safety, performance and comfort for the large-cabin field. What other plane can satisfy the most demanding clientele in the world?

If you belong to this uncompromising elite, no doubt we shall have the privilege of your visit next june, at the FALCON Display.

Paris Air Show Please let us know when you plan to come by sending your business card to Paul DELORME - Dassault International - 8.P. 32 - 92420 Vaucresson - France Tel.: (33.1) 47.41.79.21 - Telex: 203 944 F. 5-5-87

News Team Staked Out Candidate, Says Miamian Spent Night With Him

Washington Post Service
WASHINGTON — The Miami Herald has reported that a news team that staked out the Capitol Hill town house of the Democratic presidential front-runner, Gary flart, determined that a young woman from Miami spent Priday aight and Saturday with him while his wife was in Denver.

Mr. Hart, whose campaign has been debating for three weeks how to deal with questions of alleged womanizing," denounced the article as "preposterous" and "maccu-

He said he was the victim of "character assassination" by unethical and "outrageous" journal-ism that was "reduced to hiding in bushes, peeking in windows and personal harassment."

The paper said that a team of five Heraid and Knight-Ridder re-porters kept the front and rear entrances of Mr. Hart's town house under surveillance for more than 24 bours from Friday evening until Saturday night. They said they saw Mr. Hart and the woman enter the house about 11:15 P.M. Friday and aw no one leave or enter until Mr. Hart and the woman came out at about 8:40 P.M. Saturday.

Approached by the reporters later Saturday night, Mr. Hart denied having any "personal relationship" with the woman and denied that she had spent the night at his house. He said that she had come to Washington to visit friends.

The woman was identified by the Hart campaign as Donna Rice.

Mr. Hart said that she was in his town house for only a few minutes and that she and a woman friend from Miami had stayed at the home of William Broadhurst, a Washington attorney and friend of Mr. Hart. Telephones at Mr. Times reported from Washington. Broadhurst's office and home were not answered Sunday.

Mr. Hart said, however, that he had called Miss Rice in Miami several times in the past two months from campaign stops around the country. He described the calls as-"casual, political," and said he did not know what her occupation is.

The Hart campaign manager, William Dixon, said in a statement: "The story in its facts and in its inferences is totally inaccurate. Gary Hart will not dignify it with a The Herald said. comment because it's character assassination. It's harassment. He's tor of The Herald, said it was "post the next 20 years. tices suggested by Mr. Dixon," the izing issue has become a major one in Harr's campaign because it raises questions concerning the candidate's judgment and integrity. That's why we reported on this sto-

after Mr. Hart formally announced his candidacy.

The story's publication also co-incided with a poll in Iowa showing that Mr. Hart has increased his state, which is to hold the first 1988 presidential cancus. His share of the vote increased to 65 percent from 59 percent, followed by Jesse L. Jackson with 9 percent, Representative Richard A. Gephardt of Missouri, with 7 percent and Gov-ernor Michael S. Dukakis of Mas-

sachusetts with 3 percent. Sunday's New York Times magazme featured a cover story about Mr. Hart that quotes him on the womanizing issue: "Follow me around," he was quoted as saying. "I'm serious," he added. "If anybody wants to put a tail on me, go ahead. They'd be very bored."

Ouestions Raised

When reporters and editors of The Herald were questioned Sunday about the contents, some of their comments raised questions about the article. The New York Mr. Meriwether, The Herald's

executive editor, said Monday that it "could have been possible" that someone left the town house without being seen because "we had nobody there" from 3 A.M. to 5 A.M. Saturday. However, he noted that there were reporters covering all exits at the time Mr. Hart said the woman left.

The reporters next saw Mr. Hart and the woman at 8:40 P.M. Saturday, and interviewed Mr. Hart on

farious. He's a victim. Someone has served...

Canada Submarine Plan Ruffles U.S.

Defense Dept. Sees Move as Way of Closing Sea Passages

By Richard Halloran

New York Times Service WASHINGTON - Defense Department officials suggest that a Canadian plan to sequire nuclear-powered submarines to patrol Arctic waters is aimed more at closing important sea passages to the Unit-ed States and the Soviet Union than at increasing allied naval power in the Arctic.

Canada claims waters in the northern archipelago come under Canadian sovereignty. "We don't recognize that," a senior Pentagon official said. American submarines pass through those waters without seeking Canadian permission.

The officials said Sunday that it was possible a future Canadian government would use the existence of its own nuclear submarine force as grounds to challenge the passage of American submarines through the archipelago.

Beyond that, the officials sug-gested that the Canadian proposal, disclosed over the weekend in Canada, raised political, military and technological questions about where Canada would get the submarines, how they would learn to operate them and whether they would act in concert with the Unit-

Constantin Jelenski, 65, Polish Writer, Is Dead

PARIS - Constantin A. Je-

thologist who did much to bring Polish culture, literature and poetry to a wider Western audience, died Monday at the American Hospital near Paris.

"Paris without Constantin is really not Paris anymore," said Czeslaw Milosz, the Lithuanianborn, Polish-educated Nobel laureate whose poetry Mr. Jelenski translated into French.

"He was a kind of link between Poland and France, an ambassador of Polish literature," said Mr. Milosz, who is attending a colloquium at the University of Lille. "He had an understanding of things Western, and at the same time, an un-derstanding of things that for ures in Solidarity." the outlawed Westerners are completely exotic Polish labor movement, "but he and incomprehensible - a mixture knew the old guard, too," she said. of languages, national traditions and the extremely complex history of that part of Europe. There are lized, witty and generous man." not many people who are able to ride those two horses."

Mr. Jelenski was born in Warsaw in Jan. 2, 1922, and came to France in 1939 at the outbreak of World War II. He joined the 1st Polish Armored Division at the age of 18, took part in the Dunkirk evacualands, Belgium and Germany.

After the war, he worked briefly is the 6th duke. Organization in Rome, and moved to Paris in 1951 with Leonor Fini.

tributor to Kultura, the Polish magazine published in Paris, From 1976 until his retirement in Februlenski, 65, a Polish critic and an- ary, he worked for the Institut Naal d'Audiovisuelle in Paris.

Mr. Jelenski was the author, among other works, of a Frenchlanguage anthology of Polish poet-ry, "Anthologie de la poésie polo-naise."

"He was an important point of contact between Poland and Eastem Europe on one hand, and French and Anglo-American cul-ture on the other." said Mary Mc-Carthy, the American writer, who was a friend of Mr. Jelenski. "A lot of what I know about that part of the world comes from him."

Unlike many other exiles, she said, Mr. Jelenski never became a They would all come and call on him in Paris. He was a very civi-

Indonesian youths carried portraits of their former president, Sukarno, at a recent campaign demonstration in Jakarta.

By Keith B. Richburg JAKARTA — The young persons packed inside the van looked barely 16, too young to remember

the deposed leader who until re-cently had been relegated to two decades of political ignominy. Yet their posters proclaimed their political allegiance: "Brother Sukarno, We Are Your New Generation!" Mr. Sukarno was the fiery and

charismatic nationalist who led Indonesia through a fierce independence struggle and two turbulent decades as its first president, thrusting his newly independent nation to the forefront of the Third World anti-colonialist movement.

An aborted Communist coup in 1965 led to a military takeover by the country's current leader, President Suharto. Mr. Sukarno was placed under virtual house arrest until his death 17 years ago.

Mr. Sukarno's legacy and the nostalgia of his era have been revived in recent months.

The posthumous return of Mr. Sukarno has in many ways proven the most fascinating and unexpect-ed development of an otherwise predictable three-week campaign that preceded last month's election for the powerless parliament.

The Indonesian Democratic Party, an amaigam of Christian and nationalist groups including Mr. Sukarno's old Indonesian Nation-

With most of the votes counted, the Democratic Party is expected to finish with about 12 percent of the vote and seems well-placed to be-come the country's second-largest political group. In Jakarta, scene of the campaign's largest Sukarno-in-spired railies, the Democratic Party was winning about 28 percent of the vote, according to unofficial

In Indonesia's tightly controlled political system, the new reverence for Mr. Sukarno is widely seen as reflecting poorly on Mr. Suharto.

One Western diplomat said, The resurrection of Sukamo and his personality implies criticism of Suharto, because he is so color-"I like Sukarno because he was

smart, he knew how to communi-cate with the people," said a 23-year-old woman. "When Suharto ed to be re-elected next year to his piece of paper."

his legendary speaking style from unless he rehabilitates the soul of reading history books and listening the man he deposed.

Kajat Hartoyo, an editor of the ruling Golkar Party's daily newspaper, said his 17-year-old daughter has been swept up by the Sukarno

this archipelago with the wide-spread use of Mr. Sukarno's name, his picture and his image.

Mr. Sukarno's teachings are still banned. But in a ceremony last November, Mr. Suharto named him an "Independence Proclamation Hero," ending official ostracism of his name.

Some analysts said Mr. Suharto, facing a difficult period of economic retrenchment, may have tried to co-opt the Sukarno myth, only to see the Sukarno revival spin beyond the government's control.

Pro-government analysis suggested that the official acquiescence to the Sukarno revival may signal the government's heightened political confidence. They noted that few other world leaders who had seized power through the military would allow a deposed president's name and portrait to be openly used in the streets.

now, said Stamet Bratanata, a for- rally in Indonesia.

The public welfare minister, Alamsyah Ratu Perwiranegara, said Saturday that Mr. Suharto had ordered a new historical account of Indonesia's post-independence period under Mr. Sukarno because the younger generation had a dis-torted idea of what happened in the turbulent times after Indonesia's independence from the Dutch in

He said there were many books by noted historians on the Sukarno period of 1950-65 but that the government felt they did not reflect events accurately. Mr. Alamsyah said high school students had come to think that "what was wrong about that time was right, and what was right was wrong.

Throughout last month's campaign, national attention focused on one of Mr. Sukarno's daughters, Megawati Sukarno, a Democratic Party candidate for parliament and the only member of the family now

active in politics.

In a brief address to a raily of nearly a million people, she sounded remarkably like her father, according to some observers. She stirred the crowd by shouting, "Long Live Sukarno!"

Many observers said it was the first time in two decades that they The official rehabilitation is safe had heard those words spoken at a

Soviet Eavesdropping in U.S.

Missions Are Reportedly Used as Listening Posts.

By Neil A. Lewis WASHINGTON - The Soviet Union maintains an elaborate systern at East bloc embassies here to cavesdrop on sensitive U.S. govern-

ment communications, according

to intelligence authorities. The authorities, who include both present and former officials, say the Kremlin is using embassies and residences on high points in and around Washington to intercept communications, particularly those from microwave relay stations. These stations carry longdistance telephone traffic from government offices.

The interception of communications works, of course, both ways. The U.S. National Security Agency is charged with the interception of foreign communications, including those of the Soviet Union. There have been reports that listening equipment on top of the U.S. Embassy in Moscow is being used for

Several members of Congress are

Thatcher Widens Lead in Surveys

LONDON - Britain's govern ing Conservatives had an 11-point average lead in seven opinion polls carried out in April, a lead nearly 4 points higher than in March, The Independent newspaper said.

Prime Minister Margaret Thatcher is widely expected to call a general election on June 11 if results from local elections Thursday in most of Britain bear out

The combined results of seven polls published last month show 41.8 percent of the electorate supports the Conservatives, after gains of about two points from both Labor and the centrist Alliance.

urging the Reagan administration States to collect intelligence in a to scrap a 1969 agreement that allowed the United States and the Microwave traffic along the East Soviet Union to build new embas-

sies in each other's capitals. In Washington, the Soviet Union was given land on Mount Alto, one of the city's highest points. In addition to having a clear view of the Pentagon, the State Department and the White House, the Mount Alto compound also has a good view of the Naval Security Station in northwest Washington, a center for secret naval communications.

Legislators who want to remove the Russians from Mount Alto also favor razing the new U.S. Embassy building under construction in Moscow, on the ground that it is filled with Soviet listening devices. Intelligence experts say that even

from Mount Alto, they would still be able to intercept from embassies and residences in the region. "One should not think that just by depriving the Soviets of Mount

Alto they would not be able to of the earth. intercept our communications. said a government authority on se-Another official, referring to the

other East bloc missions, said, "They are surrogates of the Soviets in intelligence gathering."
Several officials mentioned as prime listening posts an East Ger-

man residence on a ridge in Arlington, Virginia, overlooking Wash-ington, and the Czechoslovak Embassy, two miles (3.2 kilometers) from the White House. The East German residence is

less than half a mile from the Pentagon. The Polish Embassy, like the Czechoslovak Embassy, is on a hill known as Mount Pleasant overlooking the White House, Moreover, the two diplomatic missions are between the White House and a microwave relay point in northwest

Washington, near Tenley Circle. Moscow uses diplomatic compounds elsewhere in the United a secure embassy in Moscow.

Microwave traffic along the East Coast reportedly is collected by listening stations at Soviet residential compounds in Gien Cove, New

York, and on the Maryland shore. The officials said another Soviet residence in New York, in the Riverdale section of the Bronx, and the Soviet Consulate in San Francisco were ideal for microwave interception because of their elevation.

Telephone transmissions travel by microwave or by satellite, as well as by land lines. The Soviet Union is able to intercept much of that, officials say, from an electronic complex at Lourdes, Cuba.

But the Cuban installation cannot intercept microwave transmissions that travel close to the earth. if the Russians were forced to move An intelligence expert, James Bamford, said the interception of microwave beams required receivers near the relay or repeater stations, which are placed about every 30 miles to account for the curva

> "Microwaves travel mostly in a straight line between the stations," he said. Mr. Bamford and other experts said interception devices did not have to be within a direct line of sight of a relay tower. The beams have side lobes that extend half a mile or more outside of the

> direct beam and can be detected. A former U.S. official said the present Soviet Embassy in Washington was surrounded by taller buildings that made eavesdropping

volume uninterrupted by lots of interference," he said. Because of the reports that the new U.S. facility being built in Moscow is riddled with bugging devices, President Ronald Reagan has pledged that the Soviet Union will not be allowed to move into its

new embassy on Mount Alto until the United States is satisfied it has

The pope was greeted Monday by mus in Angsburg, West Germany, where he appealed for Christian unity.

Pope Urges United Europe

SPEYER, West Germany — Pope John Paul II, at the end of his West German trip, called Monday for a united Europe from the Atlantic to the Urals and denounced restrictions on religious freedom

in Eastern Europe.

He made his last unjor address of a five-day trip at a Mass for 55,000 people outside Speyer's 900-year-old cathedral before a meeting with Chancellor Helmut Kohl and his return to Rome. Speaking in a divided country about a divided continent, he said Europeans of East and West should "overcome the menacing interna-

tional confrontations of states and alliances and create a new united Europe from the Atlantic to the Urals." The pope, who next month will make his third visit to Poland appealed to political leaders to "stop, at long last, the restriction and suppression of the free exercise of religious worship" in "the whole of

The pope said it was symbolic that the cathedral was built in 1030, before the schism in 1054 between the Catholic and Orthodox churches and the Protestant Reformation of the 16th century. Earlier, in Augsburg, a city that figures prominently in the history of Protestantism and the division of the church, the pope appealed for

State Dept. Study Backs Reagan On Broad Reading of ABM Pact. By Michael R. Gordon WASHINGTON - The State Department's top lawyer has com-pleted a study of the anti-ballistic missile meany of 1972 that keeps the Reagan administration on a potential collision course with Senate supporters of a stricter interpretation of the agreement, according to administration officials.

Ronald Reagan and focuses on the Senate deliberations over the treaty when it was ratified in 1972.

The study, by Abraham D. So-fact. the State Department legal

adviser, was requested by President

His results support more testing of some new types of anti-missile systems and reportedly challenges the arguments for the traditional. stricter interpretation lawored by Senator Sam Nunn, Democrat of Georgia and chairman of the Armed Services Committee, and other Senate supporters of the ABM treaty.

Mr. Nunn said in March that the ABM treaty should be strictly interpreted and that the Senate approved the treaty with a clear understanding of that.

While recent public attention has been focused on the issue of eliminating medium-range nuclear mis-siles in Europe, the administration has been considering whether it should formally adopt a new, broad interpretation of the treaty.

The administration developed

the interpretation in 1985, but because of criticism from Congress and allied nations, it has not yet moved to schedule new tests of the Strategic Defense Initiative, or SDL on the basis of this view. The Pentagon has been working on a

would involve the interception of a missile that would be fired from the Vandenberg test range in California. A network of sensors would track the missile, and information from these serisors would be used

to help guide an interceptor rocket toward it. The interceptor rocket would be fired from Kwajalein, the largest of the Marshall Islands, in the western Pacific. An administration official said

that this test would not be allowed

of the treaty because it could involve testing mobile sensors in an "ABM mode," meaning that it would demonstrate an anti-missile capability. But the official asserted that the experiment would be aiinterpretation of the treaty.

In his study, Mr. Sofaer reportedly contends that statements made by Nixon administration ofambiguous. He also maintains that statements made to the Senate by Nixon administration officials endorsing the traditional reading of the treaty did not accurately represent what happened during negoti-ations and are not binding on the

In contrast, Mr. Numn has contended that the strict view of the treaty is correct. Mr. Nunn cited numerous instances in which Nixon administration officials told the Senate in 1972 that the treaty should be strictly interpreted, and he has argued there was no need for

An initial skirmish over the treaty may be fought this week, when the Senate Foreign Relations Committee considers legislation to authorize spending for the State De-

Senator Claiborne Pell. Democrat of Rhode Island and chairman of the committee, is supporting an amendment to that bill that would endorse the traditional view of the treaty. Senator Jesse Helms, Republican of North Carolina, has sent a letter to Mr. Pell strenuously opposing this and threatening a fil-

A solid partner in the DM bond market:

Helaba Frankfurt

Helaba Frankfurt operates from the heart of Germany's financial capital.

Helaba Frankfurt - the government-backed regional bank in Frankfurt - issues its own bearer bonds and SD Certificates (Schuldscheindarlehen). With an outstanding volume of some DM 28 billion these securities are an attractive investment for private and institutional investors.

Dealers and portfolio managers of pension funds, central banks and other financial institutions appreciate this paper as a top quality investment with a high degree of liquidity.

Helaba Frankfurt offers extensive facilities for DM bonds.

Helaba Frankfurt is an active market maker for a variety of DM fixed-interest securities, ranging from the Bank's own paper to other instruments such as DM-denominated straights, zeros and Euro-

Helaba Frankfurt's placing power is considerable. Around the world institutional clients value the Bank's proven creativity and flexibility in meeting the challenges of today's markets.

Helaba Frankfurt is a member of the Frankfurt Stock Exchange.

For a solid partner in the DM bond market just contact Helaba Frankfurt, one of Germany's leading banks with total assets exceeding DM 66 billion.

The Macintosh Plus

The Macintosh SE

In 1984, Apple introduced the Macintosh." A computer based on the idea that people shouldn't have to work the way computers work. Computers should work the way people work.

It didn't take long for this idea to catch on. After all, people aren't machines. They know a good idea when they see one.

In 1986, the introduction of the Macintosh Plus established Macintosh as the new standard in personal computing. And Macintosh technology found itself

being adapted to the needs of individuals, universities and companies of every shape and size. All around the world.

Which of course led to yet another great idea. The Macintosh SE. The next natural step in the Macintosh evolution.

The Macintosh SE combines the same intuitive graphic interface of the Macintosh Plus with many of the technological enhancements corporate customers have been asking for. Or adding themselves.

Like a second 800K internal drive.

Or a built-in 20 megabyte hard disk with a single 800K internal drive. But your choices don't stop there.

The Macintosh SE comes with a full megabyte of internal memory that can be expanded to four megabytes as your hunger for power increases.

Best of all, there's an expansion slot that lets you customise the Macintosh SE to your specific needs.

So you can add a card for a disk drive that lets you work with documents created on an IBM or IBM compatible PC. Or a card that enables your Macintosh SE to communicate through non-Apple networks to host mainframes.

Of course, the Macintosh SE runs all your Macintosh programs. Only faster.

And no matter which Macintosh SE configuration you choose, you're guaranteed of one thing. You'll have one very powerful computer. And, because it's a Macintosh, vou'll never have to become a computer expert to use it.

The power to be your best.

M

Money Opens the Door

through two campaigns and four years in gress had denied him funds to carry out a the White House, David Fischer was Ronthe White House, David Fischer was Ron-cherished foreign policy goal; it had refused ald Reagan's personal assistant—"his door to vote further military aid to the Nicaraguan opener," someone said unkindly the other day. In April 1985 Mr. Fischer resigned; in October of that year he was hired as a consultant by conservative fund-raiser Carl Channell His job was to arrange brief meetings between the president and major contributors to Mr. Channell's organizations. It is said that Mr. Channell originally offered to pay him \$50,000 a meeting. That was later changed to a steady retainer of \$20,000 a month. Let us do the math for meetings like these and it can reach \$50,000 you: \$20,000 a month is \$240,000 a year.

Understand what this was for. It was not even garden-variety influence-peddling, in which people try to buy their way into the ment to affect policy. The president was not being importuned to do something he might otherwise not do. On the contrary,

contras. Mr. Channell's contributors were providing private aid to the contra cause instead. The president, we are told, was merely being asked to thank them for what in several cases were considerable sums.

Forget for a moment the foreign policy questions presented by all this, and the law enforcement questions. Ask yourself simply what manner of White House and world this is, when there is a fee for arranging per meeting or, for seven of them in a year, \$240,000. Maybe these transactions were more complex than the news accounts so far suggest. But on its face this is a truly squalid bit of commerce; it degrades all those who took part in it.

- THE WASHINGTON POST.

A Dangerous Charade

debt ceiling, set to go off at midnight May 15.

If a new and higher ceiling has not been set, or the current ceiling extended, government borrowing must stop and the United States will slide quickly into default.

Unthinkable, but that is how Congress wired the debt limit law last October. Each year Congress goes down to the deadline, then lifts the ceiling. But the game is trickier this year, and could have serious consequences. Congress threatens yet anoth-

or crisis to rattle already worried financia

markets. What is needed instead is a simple bill to raise the ceiling, with no strings. The ceiling is a sham. It has no effect on the debt. Deficits create debt; the Reagan deficits have more than doubled the national debt, to \$2.25 trillion, ceilings notwithstanding. Each time government borrowing gers close, the ceiling is raised — but not without costly eleventh-hour shenanigans that force

the Treasury into devious financing.

When the calling was raised to \$2.3 trillion six mouths ago, Congress directed that it expire on May 15 and drop back to \$2.1 trillion the next day. At that point, the debt would be higher than the ceiling. No one would hand the secretary of the Treasury into court, but he could do no further borrowing.

single savings board. Maturing debt would be paid off from cash on hand, while it lasted, The time bomb was concocted to give the Treasury no room for fiscal tricks, and to force a showdown in Congress over still

another gimmick, the Gramm-Rudman-Hollings law. Its three co-sponsors want new teeth in their misgnided balanced-budget scheme, which the Supreme Court rightly defanged last spring. They will offer their plan - automatic spending cuts if the deficit exceeds a statutory target — as an amend-ment to the debt limit bill, and there are signs that House Democrats, who opposed it last year, may buy it. Some leading Democrats figure that the automatic ax would force President Reagan to recept a tax increase, because more taxes might horrify him less than more cuts in defense.

More revenue is surely called for, but this game of chicken is dangerous. In a world already jittery over the dollar, interest rates and inflation, any new stalemate in Washington invites market turmoil. The responsible course would be for the president to accept the reality that higher taxes are needed for credible deficit reduction, and for Congress to stop bluffing about the ceiling. -THE NEW YORK TIMES

Wheat for the Asking

The Soviets have a long-term agreement to buy at least 4 million tons of U.S. wheat a year. For the past two years they have not done it, adding to the surpluses in U.S. siles and the woes in the farm belt. Last year, in an effort to save some Republican Senate seats in farm states and Republican control of the Senate, where he was majority leader, Bob Dole strong-armed the administration into offering the Soviets a subsidy to keep their word. Mr. Dole, now an undeclared presidential candidate, can talk as tough about the Soviet regime as anyone around but business is business, you understand. The State Department resisted on various grounds but never had a chance. Then the Soviets shamed the administration a second

subsidy was not generous enough.

Now, without the rough-hewn excuse of an election but while still trying to ingratiate itself with farmers, show some muscle on trade and draw down those surpluses, the administration is back at it, this time on its own. It has offered what presumably will be deeper subsidies — Agriculture Secre-tary Richard Lyng says they will make U.S.

wheat "competitive" - and the Soviets have accepted. They will buy their 4 million tons. So the U.S. taxpayer will spend per-haps \$100 million so that U.S. grain can be bought chesper in the Soviet Union than it can in the United States, Got it?

Other customers of the United States will be offended, as will rival producers, some of them staunch American allies.

The subsidies are bad economics as well. for all the reasons that the wiger heads in this very administration are wont to preach on other occasions. You set up a bidding was in which the United States subsidizes its exports, other countries subsidize theirs and, in effect, there is a transfer of money from taxpayers in exporting those that import. The balances of trade are only marginally affected. (They depend on fundamentals such as weather, exchange rates and the relation of world production to demand.) But if you can score a few political points at the expense of nothing more than principle and a foot-

note or two in the budget, who cares? - THE WASHINGTON POST.

Other Comment

President vs. Prime Minister

India is wrestling with a constitutional crisis in the form of a struggle for power between an elderly president whose term ends in July and a young prime minister whose popular support is rapidly declining. President Zail Singh and Prime Minister

Rajiv Gandhi are at each other's throats. Whatever Mr. Gandhi's faults, there is peither a credible alternative government nor even an obvious crown prince in the Congress Party. The crisis has swung all but the most severe critics of Mr. Gandhi behind him, including the two Communist parties. Mr. Singh has, therefore, been playing with fire in thinking of trying to dismiss a democratically elected head of government with two years of his mandate unexpired. There should be no thought now of a second term for Mr. Singh.

- The Guardian (London).

An Election for Whites Only

The South African election on Wednesday can easily be dismissed as irrelevant. On present reckoning it will produce a Nationalist government with a slightly increased parliamentary majority. Nonwhite South Africans will be hard put to see how their long-term destiny will be helped.

It is however a desperate philosophy which sees no hope of change even under a political system dominated by the National Party. For the prospects of change through political violence, even if they were desirable, are at the moment nii. This is a fact

which only the ill-informed are liable to doubt. At some distant stage, when the African National Congress has multiplied its destabilizing efforts by many times, things might be different, but not now. For now. South Africa will remain in the not

very kindly grip of the National Party. All the same, the National Party has shown that reform is not absolutely foreign to its nature. The hope is that after the election, President P.W. Botha will learn that any solid settlement will have to be made with black politicians who command proper support. Whatever happens, the West is unlikely to play a very major part. Sanctions, even if universally adopted, would be unlikely to influence the final outcome. Western countries could best help blacks in South Africa by making proposals which show how power can be transferred to blacks without the degree of upheaval which whites voting

on Wednesday so obviously fear. - The Independent (London).

The National Party will win, probably with a reduced majority. The question then is what Mr. Botha will do with his new mandate. If South Africa is to have a peaceful future, the process of reform which started with the recognition of black trade unions in 1979 must be continued. The repeal of the Group Areas Act, which design tes where the different races may live, and negotiations with the African National Congress are the obvious next steps. However, it is doubtful whether Mr. Botha, at the end of a long

political career, has the will to take them. - The Daily Telegraph (London).

OPINION

No People Can Prosper on Its Own Terms

المراجعة في المراجعة المراجعة في المراجعة المراجعة المراجعة في المراجعة الم

T OKYO — You do not have to be in Tokyo for long to sense that the Japanese, or at any rate their opinion leaders, think themselves u der assault from the United States. Hostile trade actions are flying fast and furiously. Little wonder that the Japanese feel besieged.

It is an understandable, if simplistic, reaction.
What the Japanese are discovering, just as Americans have discovered, is that being part of the broader world economy means sacrificing some. control over your social and economic destiny.

We do not fully understand the world economy and could not completely manage it even if we had perfect international cooperation — which, of course, we don't. The trade disputes are only the most visible, and in some ways least important, signs of ignorance and confusion. It is convenient for both sides to blame each other for something

at neither quite comprehends.

What is so disorienting to the Japanese is that their export success, intended to reduce their vulnerability to international economic shocks, is

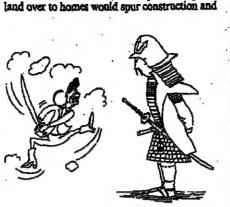

They wrongly attribute the rising yen to U.S. policy. In fact, Japan's trade surpluses made a higher yen and a lower dollar inevitable. Put mgner yen and a lower dollar thevriable. Put simply, the Japanese are earning more dollars in trade than they can continuously invest abroad. Selling those dollars to buy yen pushes up the yen's value. In turn, the higher yen creates pressures for economic, political and social changes that the Japanese are only beginning to gimpse.

The most obvious is the threat to economic properly. Because 1980 and 1985 expects economic.

growth. Between 1980 and 1985, reports economist Edward Lincoln of the Brookings Institution in Washington, almost 40 percent of Japan's eco-nomic expansion stemmed from increasing exnomic expansion stemmed from increasing ex-ports. This source of growth has vanished. Slowly and inexorably, the higher yen is making export industries less competitive. In 1986 the physical volume of Japan's exports declined 1.4 percent. Economist Kazno Nukazawa of Keidamen, the national business federation, thinks unemploy-

national business federation, timits unemploy-ment could exceed 4 percent within a few years. This seems low by U.S. standards, but Japan's memployment is calculated somewhat differently. According to Mr. Nukazawa, a 4 percent rate in Japan would roughly equal a 6 to 7 percent U.S. rate. More relevant, it would be almost three times Japan's average for most of the 1970s, which was 1.6 percent. Slower economic growth, perhaps even a recession, would intensify strains on JaBy Robert J. Samuelson

pan's system of "lifetime employment" in larger companies. (Contrary to popular impression, it has never applied to many smaller firms.) Already some are cutting back part-time workers. Good jobs for younger workers will be harder to find. A singuish economy is propelling subjects onto the political agenda that were taboo only a few years ago. If exports will not increase economic growth, what will? One possibility is farm and land reform. In cities, even in the Tokyo area, you can find small rice and vegetable fields. With land so valuable, it seems crazy. Turning this

spending on appliances and furniture. It would also relieve Japan's acute overcrowding. In the Tokyo-Yokohama area, the average home or apartment has fewer than four small rooms.

But farming is heavily subsidized and protected. Rice prices are six to 10 times the world level. Farmland is lightly taxed, but if it is sold, the profits may face heavy taxation. Although most farmers are part-time, these policies have long enjoyed widespread public support. Maintaining some food self-sufficiency is popular, and many Japanese city workers — only a generation removed from farm life themselves - have a nos-

talgic attachment to the land.

These traditional attitudes are being increasingly questioned. Not only is there a need for greater

economic growth, but the rising yen makes it cheaper for the Japanese to travel abroad, where they see how much lower food prices are elsewhere Japanese overseas travelers may total 7 million this year, up almost 50 percent since 1984.

All this implies more conflicts, choices and change for the Japanese. It is a condition that they have not sought and do not relish. The country is developing what Jimmy Certer would call a case of "malaise." Japan is still prosperous,

but the prosperity seems less secure.

Ever since World War II, Japanese have had a firm notion of their place in the world economy. Japan, this reasoning went, was a resource-poor nation that needed to export so as to import essential foodstuffs, fuel and ores. Scarcity was a permanent anxiety. As recently as 1973, Japanese consumers hoarded toilet paper and other prodacts based on imports, due to fears of shortages. When oil prices rose in the 1970s, the Japanese response was to work harder and to export more. It is this attitude that now seems archaic.

There is an interesting contrast of national styles between Japanese and Americans. The Japanese are at once more cosmopolitan and more parochial. They are far better informed about America than Americans are about them. Americans have not been adept at understanding other societies. But, as a practical matter, the United States is a more open society to foreigners, accepting immigrants and imports far more easily. By contrast, the methodical efforts of the Japanese to educate themselves about other na-tions—an integral part of their export success— have ultimately been intended to maintain the

insularity and autonomy of Japanese society.

This vision is slowly fading. There is an increasingly shared fate between Japanese and Americans, based on their respective illusions.

Americans thought that expanding international trade would create a prosperous and stable world, with the United States as a political and economic model for everyone else. Little did they imagine how unstable a true world economy neight be, or that other nations might challenge America's economic leadership. The Japanese believed that successful exporting would guaran-tee economic and social stability at home. Each side saw trade as a way of promoting its national way of life. Both wanted and expected trade on their own terms, and neither has got it.

The Washington Post.

Election Day in South Africa: The View From a Cell

BERLIN — At 6 A.M. on Wednesday, the polls will open for South

Africa's whites-only election. At the same hour, Janet Cherry and

Sue Lund wil be wakened by the unlocking of a cell door in "B" passage of the North End Prison in Port Elizabeth. For these women, unlike for most other white South Africans, it will be a tedious day. Ms. Cherry has been in this prison for 239 days, Ms. Lund for 165. Both are held under South Africa's emergency regulations.

About 9:30 A.M., the two women

will begin a strenuous program of vol-untary exercise in the small courtyard next to their cell. At this hour, the South African president, Pieter W. Bo-tha, will exercise his vote. He is the most powerful man in modern South African history, not accountable to the courts, Parliament or the people. Like Ms. Cherry and Ms. Lund,

most South Africans see these elections as a sideshow, political shadowboxing that is called democratic only

sponse to the military unrest in Ar-

gentina was to reduce drastically the possibilities of a coup. But there are many other less visible, more

profound consequences emerging from the ongoing process of demo-cratization in Latin America.

One of the least expected is the

growing firmness of those new gov-ernments in their dealings with the United States. Two recent incidents

in Geneva a month ago.

What Do We Call a System Like This? D URING the current state of emergency, brutal assaults on black communities have become routine. The repression of trade unions and free speech has intensified; the ANC leader Nelson Mandels remains in prison. Given the inhumane conditions forced on black South Africans on a daily basis, what is surprising is that there has not been more violent retaliation What is disappointing is that the United States, as the world's most influential

democracy, has not done more to bring this brutal tyranny to an end.

The election Wednesday makes a mockery of the democratic ideals we profess to be a cornerstone of U.S. foreign policy. What do we call a political system that allows only the 18 percent of its people who are white to vote? Apartheid's apologists have dredged up a variety of euphemisms to describe the Pretoxia apologists made discussed in a variety of characterists to describe the receiver, regime, terms like "parliamentary oligarchy" or "authoritarian government." Let us call it what it is — a racist dictatorship unworthy of U.S. support. - Coretta Scott King, in a syndicated column.

if white political prisoners pass by. Those South Africans like Ma. Cherry and Ms. Lund who resist white rule in South Africa are remarkable for the strength of their commitment to fight racism. In August 1983, the United Democratic Front, a loose,

nonracial association of about 700 anti-apartheid organizations, was formed to oppose Mr. Botha's attempt to change the nation's constitution. The change opened the parliamentary process to Asians and people of mixed races by including them in minor chambers of a tricameral parliament.

Ms. Cherry and Ms. Lund were string in this and other continuous active in this and other anti-government programs, including a campaign to end the conscription of young

ties led to their detention. Like many other activists, neither woman has been brought before the courts. The UDF has been spectacularly gress. The growth of opposition to white domination has been felt in every stratum of South African society.

In the face of a newly mobilized opposition, the security establishment has responded forcefully. The country has been caught in an unprecedented wave of violence.

On June 12 of last year, the govern-ment imposed the second state of emergency in as many years. So activists detained that day are still in prison. Exactly how many people have been arrested is not known: some estimates put the figure at

The bank's decisions are made by

of loan capital in danger.

30,000, many of them children. Government curbs on reporting have left an impression of cerie calm over the country. With the leaders of protest movements in jail and the turbulent townships under armed occupation, popular resistance to apartheid would seem to have all but collapsed. The 33,783 voters of North Rand,

the country's largest constituency, will cast their votes believing this to be the case. Like their fellow white countrymen, they will give Mr. Boths the support for which he has asked. For those who had doubts about the government's strategy of force, the state-controlled media have as-sured them that behind every politi-cal detaines there lurks the hidden hand of the Soviet Union. Simplistic anti-communism is a powerful ideology in white South Africa.

By 3:30 P.M., the day will be all

but over for Ms. Cherry and Ms. Lund. They will est supper, and the bars of their cell will be locked for the successful in articulating opposition to apartheid and in rekindling mass support for the African National ComBlacks in other sections of the jail will sing of the imprisoned Nelson Mandela, the ANC and their yearning for liberation. Ms. Cherry and Ms. Lund will answer with similar lyrics.

At this hour, President Botha will relax, confident that he has deflected the pressure from the right and the left of his party. White South Africa will have voted to continue the repression of the country's majority. But Mr. Botha's victory will be a hollow one. As the ongoing strike by rail workers shows. South Africa's trade tmions are as determined to end white domination as are the political organizations. The unions can wreak havor on the nation's economy. The state's inability to contain these forces has led to new violence and detentions. But the grass-roots oppo-

sition to apartheid is unshaken.
At 10 P.M. the lights in "B" passage of North End Prison will go out The nation's 72-year-old president will be feeling tired but satisfied with the events of the day. He may read from his Bible, as he says he does

each night, before dozing off.

But the day's events will do little to end South Africa's trauma. The whiteonly elections are a symptom of apart-heid, not a cure. Ironically, a clue to the country's salvation is found in the deeply moving literature of Mr. Botha's mother tongue, Afrikaans, As N.P. van Wyk Louw, the esteemed poet, wrote about his own "tribe,"
"If you ensiave a proud people, then
resistance becomes its right."

The writer is director of the Institute of Social and Economic Research at Rhodes University in Grahamstown, South Africa, and is currently a visiting fellow at the Free University in Berlin. His wife, Louise, shared a cell with Ms. Cherry and Ms. Lund until last Oct. 30. He contributed this comment to the International Herald Tribune.

Nazi Dirt Lies Under **Both Rugs**

By Flora Lewis

PARIS — The trial of Klaus Bar-I bie known as the "butcher of Lyon" for his wartime Gestapo activi-ties finally starts next week. It will be something of an ordeal for France. which never really faced up to the extent of collaboration in Nazi atroctities during the German occupation. It should be for the United States as well. Jacques Vergès, the enigmatic law-yer who is defending Barbie, says that "France lives on an official truth that

make the most of Barbie's incriminating knowledge about wartime France. A Dostoyevskian figure, Mr. Verges has defended the Lebanese terrorist Georges Ibrahim Abdallah, among others. He explains his choice of clients as a "passion." Crime, especially political crime, fascinates him, apparently as an expression of his revulsion against the social establishment. "By crime," he said at a news conference. "man leaves the animal kingdom and' becomes man, or God."

is still not real, it is a lie." He plans to

He likes to point out that France "has pardoned itself for deeds" atrocities in the Algerian war —
"which it cannot partion in others."
He says it would be improper for a

lawyer not to use any argument that could be useful for the defense. He has not yet said whether he will introduce, the evidence that the United States employed Barbie as an intelligence agent in Germany after the war, hiding him from the French until the risk

of exposure became too great and he-was spirited off to exile in Bolivia in 1951, at U.S. expense.

Barbie was handed over to the Barbie was handed over to the Greatling administration in Belivia of civilian administration in Bolivia. That revived stories about his U.S. Justice conducted an investigation, a report was published in Angust 1983 and the United States sent France a formal note of "deep regrets" for its role in obstructing justice.

The report was a strange combina-tion of shocking revelations about-U.S. recruitment and protection of Nazis to spy on Communists, and of excuses and objuscations. Allan A. Ryan Jr., the special assistant who wrote it, said that the choice of army intelligence officers to use Barbie and his kind "was neither cynical nor corrupt" in the circumstances.

Mr. Ryan gave details of how the United States paid a former Croat terrorist for Barbie's escape on one of the "rat lines" that belped war criminais to flee arrest. He said this was a unique case. That is evidently untrue. Mr. Ryan wrote that the series of illegal acts in harhoring Barbie were not just the fault of a few intelligence officers and that the S. government shared responsibility, "But," he con-cluded, "it is not naive to believe that we have seen the end of the attitude that anything is permissible, including the obstruction of justice, if it falls

under the closk of intelligence. The gaps in the report and continu ing charges of many similar Peter Rodino, chairman of the House Judiciary Committee, to ask for a review of America's role in helping Nazis to resettle in the United States, & Canada and Latin America. The General Accounting Office produced an-other report in June 1985 that revealed more, but again selectively and with the justification that the people in question had done "a service" to the United States by providing intelli-gence against the Russians.

Former Congresswoman Elizabeth Holtzman, who has steadily pushed for an honest disclosure of secret postwar support for Nazi criminals, wrote Mr. Rodino that the GAO report was "seriously flawed and hopelessly inad-equate," which it was. The GAO said it was given all existing documents it requested, but "some could not be located or had been destroyed." And in any case, "intelligence agencies of-ten assign projects innocuous names," so the investigators "cannot assure" that they asked for all the right papers. The cover-up has never ended. It

became too embarrassing to admit what had gone on, in violation of U.S. policy, U.S. Isw, simple morality and, furthermore, effectiveness, Michel Thomas, a former French resistance fighter who worked for U.S. Army intelligence in Germany immediate after the war until he saw what it was doing quit in disgust. On top of everything else, he says, the "intelligence obtained was totally useless.

obtained was totally usness.

There is still a point in trying Barbie, but there is a more important point in clearing up these scandals. As Mr. Ryan wrote, intelligence agencies do tend to ignore everything but their operational goals. He is wrong to think that it can't happen again.
The United States refuses to forget

what President Kurt Waldheim of Austria cannot manage to remember. Fine, but America should also remember to clean up its own house.

Read, Write and Figure

WHEN I hear people talking about how to "teach values," I reach for my cant-detector. Two things are predictable about the "teaching values" fad. One is that insofar as it is admonitory in technique — schoolmesterly finger-wag-ging — it will run in torrents off the duck's back. The other is that there will be a war over whose values it is likely to teach. Meanwhile, no one - still - will be learning to read, write or figure. Syndicated cohomist Edwin Yoder.

It is not an effort to propagandize yell at them, but we do not actually try -children. It is a serious appeal to schools But teachers are saying some interesting things and attention should be paid.

But teachers are saying some interesting things and attention should be paid.

But teachers are saying some interesting things and attention should be paid. They could turn out to be more impor- freedom and tyranny does involve choice, decision and acceptance of re-sponsibility. The document starts with some clear-cut premises:

a matter of life and death.

Laying down principles for education in democracy obviously is important, and so is the next step - curriculum

examination and change.

In California, a curriculum evaluation. is taking place with education in democratic rights and obligations the goal. In most other states, county governments and school boards have primary responsibility. New alliances are being formed; parents and teachers both liberal and conservative are finding common ground.

There can be a price to pay for taking a long look at a school curriculum to see if an understanding of democratic prin-ciples is built into it. It may cost money — perhaps more teachers and new text-books — but it will be cheap in the long run. Isnorance of the history of freedom winds up costing a great deal.

The New York Times.

A Delicate Balance on the Slopes of Lanai

T ANAI CITY, Hawaii — Deer hunters were ranging the craegy slopes of this pineapple island on a recent weekend, which suggests that even in the mid-dle of the Pacific Ocean it is hard to get the World Wildlife Fund — though not away from mankind's peculiar touch.

A Pacific island, with cliffs dropping steeply to the sea and much of its surface covered with precise rows of pineapple plants, is not where deer hunters might ordinarily be expected. Nor do boatmen customarily see plastic- nolulu he spoke at a symposium on bagged deer heads, with antiers protruding, on the docks awaiting water transportation to another island.

But deer do roam the hills and scarce vegetation of Lanai, one of the Hawaiian islands. A hunting season is considered necessary to prevent them from overpopulating and starving, or ruining the neat gardens and shrubbery of Lanai City, where most of the island's few residents live. Hunters from the other islands flock here, and often carry off their kill by boat to Mani or Oahu.

So at isolated Manele Bay, bemused sailors and yachtsmen turned their attention from rising winds and seas to the hunters home from the hill. Other than the threatening weather and the antlered heads, they talked mostly of where a planned new tourist hotel might be built close to the protected little boat basin, or fronting on an idyllic nearby beach? Neither site was popular with people who had sailed from Honolulu and Lahaina or even further to escape tennis courts and high-rise buildings.
Prince Philip of Britain was in Hawaii By Tom Wicker

the World Wildlife Fund - though not to condemn the deer hunters of Lanai,

and certainly not to join them. He braved winds gusting to nearly 50 miles per hour (80 kph) to dedicate a new telescope atop Mauna Kea in Hawaii - the so-called Big Island. In Ho-

MEANWHILE

"The Roots of Life," passionately de-claring that the world's rapidly depleting forest resources must be preserved. or "your grandchildren will be in serious trouble." The planet's vegetation, he insisted, "is the roots of life."

Hawaii, that garden spot of the airline ads, was an apt target for his message. The Honolulu Star-Bulletin reports that more than 60 percent of the islands' native rain forest has been "cleared for plantations, ranches and urban sprawl." Prince Philip had nothing to say about the hotel soon to rise at Manele Bay, but he did point out that tourism, while "not necessarily bad," would bring "bad news if the natural environment is destroyed simply because of something tourists want. If there isn't a natural environment here, you won't get the tourists, either."

Amen to that But even the office- and hotel-towered skyline of modern Honolulu cannot much detract from the magic of the sun rising behind Diamond Head as

an early-sailing boat slips to sea with the dawn. Under lightening skies, Koko Head soon rises boldly along the coast of Oahu; and by the time the island of Molokai lies dim and blue on the horizon, choppy channel seas remind a landlubber that the elements, at least, yield little to

the ceaseless impertinence of man. The low, long, rather barren shoreline of Molokai rolls on grimly until it gives way, beyond a narrow channel, to the high cliffs of Lanai. Interrupted only by a barge port, those cliffs lend the island a fortress look, as if the outside world could

never find a foothold there. But behind the breakwater at Manele Bay - 16 hours out of Honolulu on a recent light-wind passage — a small but sociable world of boatmen clings without telephones, electricity or worldly amenity to the few available docks and moorings. Sometimes on weekends, this amiable community swells beyond capacity. spreading a spider web of lines and chains across the shallow anchorage.

From it, a narrow road winds steeply to the pineapple fields stretching endlessly across the red clay of the island plateau, and to tiny Lanai City huddled in a rare but spectacular stand of huge pine trees. It may be necessary for man to thin out the island's deer population; but amid its quiet fields, its hills above the perilous sea, Prince Philip's warning seems amplified: Man already has so distorted and sometimes destroyed his natural environment that what little remains seems doubly worth preserving. The New York Times.

LETTERS TO THE EDITOR

A Future for Five Billion

Regarding the opinion column "Popula-tion: Don't Be Frightened by the Numbers" (April 27) by Jonathan Power:

In its forthcoming report, the United Nations Fund for Population Activities points out that the world's population has reached five billion and is growing by 220,000 every day. Mr. Power calls

that "scaremongering,"
We should celebrate the birth of Baby Five Billion as we celebrate that of any baby. But responsible people must think of the baby's future. That is the nub of the UNFPA report. Whatever the child's talents for survival, it is a tough world. For billions of poor people in developing countries — and there is a nine in ten chance that Baby Five Billion will be In Defense of Pesticides born in one - it is getting tougher.

Yes, developing countries have shown remarkable adaptability. Yes, economic growth would solve a lot of problems. But more and more countries are deciding that faster economic growth will not be possible without slower population growth, Mr. Power fails to mention that South Korea's remarkably successful family planning program marched step for step with its economic success. The same is true of Singapore and Indonesia, among others. India, China, Bangladesh, Brazil, Nigeria, Egypt — the economic and population giants of the Third World have come to the same conclusions.

Mr. Power kindly acknowledges the value of UNFPA-supported family plan-ning programs. But his argument assumes that they are "optional extras" in development programs. They are not For many countries, slower population growth may mean the difference between success and failure in the struggle for development. This will affect the sustainability of the global economy and the global environment. For many people, including Baby Five Billion, it may mean the difference between life and death.

JYOTI S. SINGH. Chief of Information Division. UNFPA, New York

Regarding "We're Aiming at Ourselves When We Spray the Bugs" (Meanwhile, April 21) by Cobman McCarthy:

This column on pesticides attracted our interest, and we would like to respond

to some of its uninformed claims. On chlordane: This product was banned for all uses except termite-proofing houses, where no other product comes close to performing as well. It was banned because it causes liver tumors in mouses. And in man? A Harvard School of Public Health study of workers at a factory

producing chlordane and heptachlor, and where exposure would be far heavier than to the general public, concluded that there was "no overall excess of deaths from cancer, even among workers fol-lowed 20 or more years."

On the contamination of groundwater, game meat, grain and so on: Mr. McCarthy says that all the above have been contaminated by pesticides. But by which pesticides, and at what level? It is the dose that determines whether a chemical presence is significant.

Foods are chemicals, and "natural foods," such as the potato, tea and coffee, various spices, celery and parsnips contain many toxic compounds evolved by plants as a natural defense against disease and parasites. Professor B.N. Ames says that "the human dietary intake of 'nature's pesticides' is likely to be several grams per day - probably at least 10,000 times higher than the dietary intake of man-made pesticides."

He adds that "our knowledge of the toxicological effects of new man-made pesticides is extensive, and general expo-

sure is exceedingly low."
Finally, Mr. McCarthy quotes a National Academy of Sciences report pur-porting that only 10 percent of pesticides are adequately tested to assess health hazards. This is unsupported by fact. The academy's finding was based

primarily on a 15-chemical subsample of the subsample, six chemicals are not used in pesticide formulations. Three are intermediates or inerts in the manufacturing process, and the six others have been registered with the Environmental Protection Agency and are sup-ported fully by health and safety data.

G.R. GARDINER. International Group of National Associations of Manufacturers of Agrochemical Products, Brussels.

Butchers of All Countries

So Anthony Lewis believes that "What the Camp Guards Did Must Never Be Forgotten" (IHT, April 23). I only wish his memory of the far greater crimes of Stalin was equally vivid. Hitler killed six million Jews, but Ukrainian victims of the starvation in the early 1930s, deliberately engineered by Stalin, alone numbered that many. Stalin's

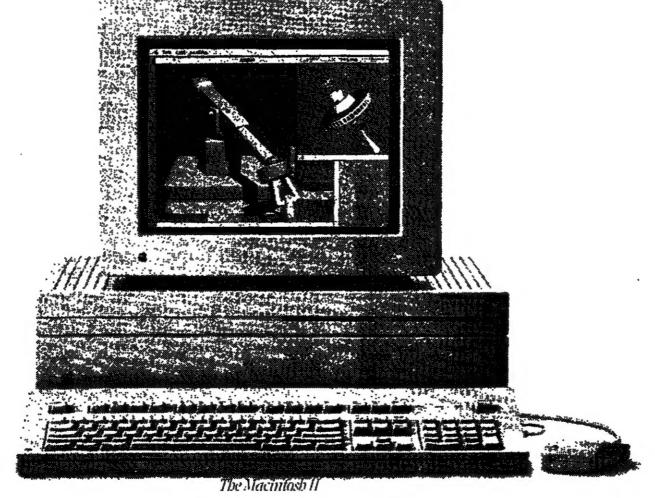

Great Terror took many more lives. The Soviet Union today is ruled by the same Communist Party that oversaw these mass murders. The perpetrators of Stalin's crimes walk Soviet streets today, honored for their past services. And this is the country to which the United States has deported Karl Linnas.

a selection of 50 chemicals drawn from a nals to the Soviet Union, let the Soviets computerized list of 3,350 chemicals. Of bring justice to those in their own ranks who have committed even greater crimes. Until then, let us sentence the Karl Linnases here in the West.

But let us not practice selective remembrance like Mr. Lewis who never seems to have anything to say about Soviet, or Vietnamese, or Cambodian, or Ethiopian, or Cuban, or any Communist crimes. We must remember the butchers of all countries and ideologies. EDGAR C. SHERMAN. Heerde, The Netherlands.

The United States should follow Canada's lead and consider amending its criminal code to allow for prosecution of suspected war criminals rather than revoking a person's citizenship and de-porting him or her to a foreign country, there abuses of justice may occur and American rules of evidence may not be followed. Canada's proposal to amend the Criminal Code to allow for prosecution of war criminals by Canadian courts has received favorable reaction from Jewish and Ukrainian groups and hopefully will ease tensions such as those that have developed over cases like that of John Demjanjuk.

DONALD B. PATTERSON. Montpellier, France.

In addition to the Macintosh™ SE, Apple proudly introduces another member of the Macintosh family:

The Macintosh II.

A computer so powerful and so flexible it challenges the very definition of what a personal computer can be. And do.

Inside the Macintosh II resides a new microprocessor of enormous power and possibilities. The Motorola 68020.

At blinding speeds it roars through nearly every Macintosh program available. At four times the speed of a Macintosh Plus.

The Macintosh II also boasts a new

coprocessor. The Motorola 68881.

This new piece of electronic wizardry enables the Macintosh II to perform mathematical calculations at two hundred times the speed of the Macintosh Plus.

But the biggest news is the Macintosh II is totally open to your needs. With six expansion slots that allow you to customise your Macintosh to serve virtually any function you can imagine.

In fact, the open architecture of the Macintosh II is so open you won't be left behind by the advent of new technologies. No matter how advanced or colourful they may be.

Speaking of colours, the Macintosh II offers

video of almost photographic quality. With a palette of over 16 million colours to express yourself with.

And speaking of speaking, the Macintosh II speaks. With a four voice, custom digital sound chip that can reproduce the power of a symphony orchestra or the subtleties of a human voice.

Internally, the Macintosh II offers you more memory options than a politician. From one to eight megabytes.

And although we feel our internal forty megabyte hard drive is probably sufficient storage for most users, you can employ drives of up to eighty megabytes if you so desire.

The modular configuration of the

Macintosh II offers you a choice of viewpoints.

A thirteen inch colour monitor or a twelve inch black and white.

The Macintosh II will satisfy the needs of the most power hungry business user, scientist or

Tomorrow, it will also lead the way into startling new technologies. From laser-encoded memories that can store encyclopedias of information to who knows?

After all, one good idea inevitably leads to another.

The power to be your best.

At first glance, nature and technology may seem to represent opposite poles. In fact, an affinity with nature makes a vehicle better equipped to ride the wind, bear the cold, beat the heat, and tame the roughest terrain. For this reason, we look to nature for inspiration, then apply whatever insight we gain to our technology. We aim to build cars that meet the requirements of both man and nature in a harmonious way. Cars that are technologically advanced, yes, but more than that, cars that are as reliable as the coming and going of the seasons. Because in our many years of making cars, we've always come back to the same conclusion. The more a car understands nature, the better it can meet its challenges.

Nissan...it's only natural.

Specifications and equipment may vary according to market.

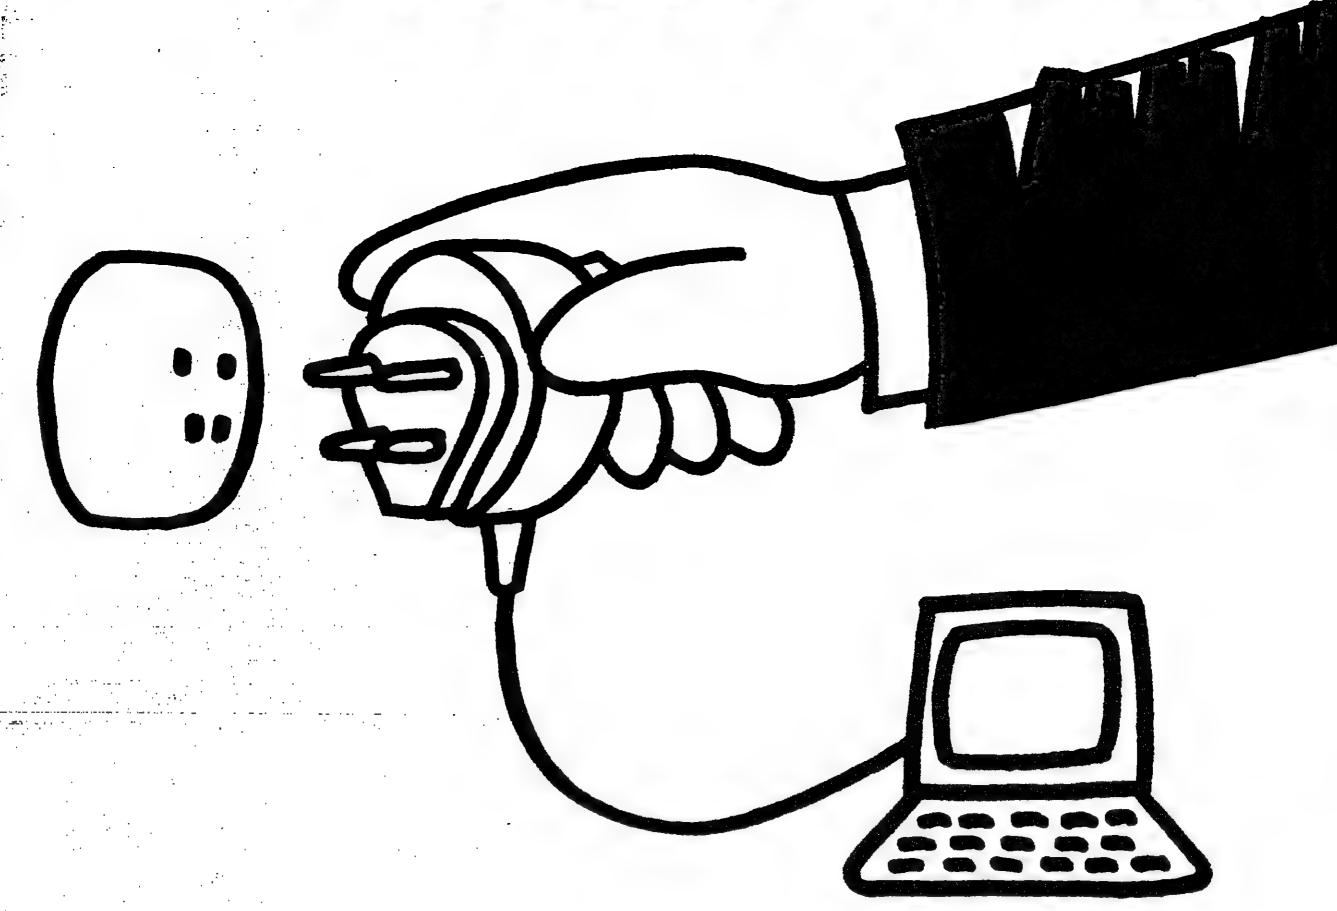

WHAT NATURE TAUGHT US ABOUT BUILDING CARS

THE ERICSSON CONNECTION.

This is the easy new way to spread computer power within your company.

Yesterday, computer power was reserved for the company's "heavy users" and the natural solution was to hook up a separate data network.

Tomorrow, information and computer power must be available to everyone. Throughout the company. And most people will use their equipment only a few hours each day.

Therefore our idea is the only feasible one. With our new digital office exchange you can use your existing telephone network! And plug in personal computers, word processors and terminals as easily as telephones.

This simplicity is one half of our strategy.

The other half is "openness".

"Openness" to other systems, to international standards and to the future.

One example: on our new generation of terminals all you need to do is press a button to shift from IBM to DEC to Sperry, etc.

We know that this "openness" is good for our customers. But it's just as important to us at Ericsson. Without it we couldn't break into other computer worlds and build the functional and economical information systems you need.

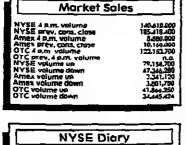

That's why "openness" is fundamental to us at Ericsson.

It should be equally fundamental to you.

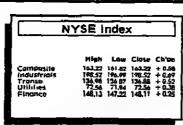

In fact, we have common interests.

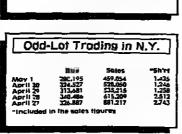

ERICSSON =

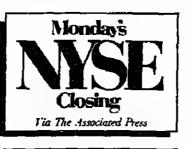

Ericsson Information Systems

NEW YORK - Prices on the New York Stock Exchange ended mixed in sleepy trading Monday after a flurry of late buying crased losses in the blue-chip group. The market was under pressure from a weak dollar, slipping bond prices and soaring prices for precious

The Dow Jones industrial average, down 9 points half an hour before the close, ended with a gain of 5.82 points at 2,286,22. But losing issues outnumbered gainers 8-7. Volume was about 140.6 million shares, down from 160.1 million Friday.

Broad market indexes advanced. The New

York Stock Exchange composite index rose 0.58 to 163.22, and Standard & Poor's 500-stock index climbed 1.33 to 289.36. The price of an average share roce 15 cents. Traders said attention to the dollar, bond

prices and precious metals eroded modest gains posted shortly after the opening. At 10 A.M., the Dow was up 10 points but at one point in the early afternoon it was down 17. Participants said trading was essentially aimless, Many investors stepped to the sidelines to await this week's Treasury refinancing. The Treasury plans to sell \$29 billion of notes and bonds in a three-part auction beginning Tues-

The market is directionless, but beneath the surface there's a lot of tension, with people watching the dollar very carefully to see wheth-er it can stabilize," said Hugh Johnson, head of

INTERNATIONAL STOCK MARKETS

Amsterdam Likely to Rise When Dollar Relaxes Hold

By RONALD VAN DE KROL

Special to the Herald Tribune

MSTERDAM — The Amsterdam Stock Exchange is likely to remain under the dollar's influence in the short term, but analysts say it could well rise later this year if currency factors relax their grip. Experts said that some sectors of the stock market, particularly insurance, are greatly undervalued in international terms and look set to rise in the long term once the currency picture clears.

But they acknowledge that until then the market will remain largely dependent on the whims of the currency markets. And no one is willing to try to predict exactly when the turnaround will come or when foreign investors will return in force to the market. The Amsterdam market has room for respectable growth later in the year, provided the dollar stops dictating the tone here," an

analyst at a major Dutch bank The Amsterdam Stock Exchange has languished in the shadow of the lower dollar for the past six months, rising whenever the U.S. currency shows signs of recovery and dipping when presented with fresh evidence of further dol-

'Current price levels reflect an exaggerated fear of the dollar's influence.'

The ANP-CBS general share index, which stood at 278.4 at the end of last year, fell to a low of 257.7 in late January when the dollar sank below 2 guilders. It later edged up to a 1987 high of 293.4 in early April as the currency accord reached by six major industrialized nations in Paris in February showed some signs of

Since then, however, the market has again been dampened by currency worries, this time by fears of a possible U.S.-Japanese trade war that could lead to renewed dollar declines. The index ended last week at 280.6, near its level at the beginning of the year, while the dollar hovered just above 2 guilders at 2.0175.

Analysts said that even a convincing stabilization of the U.S. currency at its lower levels would benefit the Amsterdam market, helping foreign investors in particular to shift their attention back to the relative health of Dutch companies and away from the short-term effect of a declining dollar on profits in guilder terms.

NALYSTS generally agreed that 1986 profit figures recently released by Dutch companies showed that investors' worst fears had not materialized. "Current price levels reflect an exaggerated fear of the dollar's influence, but it's a difficult thing to prove," Pim Kruisinga, of Banque Paribas Nederland NV,

With a price/earnings ratio of under 11 percent, the Amsterdam exchange is considered to be a bargain by the standards of other markets. The Netherlands still offers opportunities to the foreign investor, though less to the Americans because of the currency risk than to the Europeans and the Japanese," Mr.

Foreign investors, who began turning away from Amsterdam in September, are believed to hold the key to the Dutch market. A revival of overseas demand would easily pull the entire market higher, although analysts warn against expecting any major rise. Dutch interest rates are unlikely to come down much further and Dutch corporate profits will probably show moderate rather than significant gains compared with 1986.

Thomas Thomassen, of Dutch merchant bank Pierson, Heldring & Pierson, said he thought the stock exchange would remain basically flat into the summer holiday period, with the possibility of an improvement thereafter.

We are reasonably optimistic about the bourse in the long run but have no high expectations for it in the short term," he said. The Dutch market is still capable of producing a total return on investment of 17 percent over the next 12 months as long as shares are bought selectively, he said.

He said his bank was optimistic about the outlook for both the See STOCKS, Page 15

Conable **Shuffles** Top Jobs

Major Changes At World Bank

By Hobart Rowen Washington Pass Service
WASHINGTON — Barber B. Conable Jr., president of the World Bank, announced on Monday a major, long-expected reorganization of the bank but had to delay a med initiative to manage the Third World debt problem.

Mr. Conable's redesign will result in a job swap between the bank's two senior vice presidents. Ernest Stern and Moeen Qureshi, and the appointments of two regional vice presidents, W. David Hopper of Canada and Willi Wapenhans of West Germany, to new posts as senior vice presidents.

In an effort to put his imprint on policy and operations, Mr. Con-able cut by at least half the wideranging power that Mr. Stern had as senior vice president for operations, and transferred what was left to Mr. Oureshi, of Pakistan.

Mr. Qureshi will inherit Mr. Stern's authority over bank operations. Mr. Stern, whose agreement to stay on as senior vice president for finance surprised many of his colleagues, will be in charge of bank financing, formerly Mr. Qureshi's main function.

Mr. Conable had hoped to be able to announce Monday a bold approach to the Third World debt oblem by naming a coordinator for the bank's role in that area.

It was learned that last week he offered the assignment to the World Bank's vice president and treasurer, Eugene H. Rotberg, who vas passed over for the senior post that will so to Mr. Stern.

Mr. Kotberg, who is highly re-garded in financial markets for his stewardship of the bank's huge bor-rowings, is said to be weighing the offer against opportunities in the

As a result of the dismantling of Mr. Stem's huge portfolio, many planning and research operations, and a large number of economists, will be shifted to Mr. Hopper.

Mr. Conable said that the reornization would result in the abolition as many as 600 jobs, about 10 ercent of the existing work force, including at least 50 managerial positions. He said the cost of severance pay would be about \$150 million, to be made up in increased

He said the reorganization, which will also include a new department for the environment and expanded work on the role of women, came in response to complaints from donor countries that the bank countries that it was not responsive to their needs.

He said he had hoped to bring people in from outside but had not been offered personnel be considered more attractive than those in the bank.

"But I do not rule out the possibility of bringing in highly quali-fied people in the future," he added. "I expect to go outside and

Reagan to Fete Success, but Employees Fear for Jobs

By Warren Brown

Washington Past Service YORK, Pennsylvania — President Ronald Reagan is to come here this week to honor a U.S. company that climbed back from pear financial ruin and put aside the shield of protectionism to

take on foreign competitors. The company is Harley-Da-vidson Inc., of Harley Hog fame, the only U.S. manufacturer of the big motorcycles that, five vears ago, came almost exclusively to bear Japanese brand

Harley-Davidson officials complained then that the Japanese were flooding the U.S. market with heavyweight motorcycles - deliberately overproducing to build up great inventories that later would be sold off at cut-rate prices.

The company appealed to the U.S. International Trade Commission, which found that Harlev-Davidson had been badly hurt by the imports from Honda, Kawasaki, Suzuki and Yamaha. In April 1983, the Reagan administration ordered a tenfold

increase in tariffs on imported heavyweight cycles.

Thus protected, Harley-Davidson proceeded to cut manufacturing costs, to improve management and product and to

'We no longer need the special tariffs in order to compete.7

— Vaughn L. Beals.

recapture the share of the market it had lost.

The story could have ended there. But Harley-Davidson officials went one step further. In an unprecedented move this year, they asked the ITC to drop the tariffs that had saved their com-

"We no longer need the spe-cial tariffs in order to compete with the Japanese," said Harley-Davidson's chairman, Vaughn L.

could not have come at a better time for the Reagan administration, which is battling increasingly tough odds in trying to stem protectionist sentiment on Capitol Hill. So, the president is coming to

southeastern Pennsylvania to visit one of the two Harley-Davidson plants making the thunderous motorcycles. There will be speeches and plant tours. There will be numer-

ous reporters and pundits. And there will people like Harry Smith, a 36-year-old union leader who has worked 17 years at the plant.

"I don't know much about politics and I really don't care about it, either," said Mr. Smith, president of Local 175 of the international Association of Machinists, which represents 923 production workers at the prawling plant.
I do know that the tariffs

U.S. Productivity Rose 1.7% in First Quarter; Wages Dropped 4.9%

Washington — Nonfarm businesses in the United States ended a six-month decline by increasing productivity 1.7 percent during the first quarter of 1987, but pay per hour fell 4.9 percent after accounting for inflation.

Hourly wages and benefits — in absolute dollar costs not accounting for inflation — edged up at an annual rate of 0.1 percent, the Bureau of Labor Statistics said Monday. That matched the 0.1 percent increase in the spring of 1949, which was the smallest increase in hourly labor costs on record. The bureau has been keeping those statistics since 1947.

Nonfarm companies increased output 5.4 percent — the best showing since April-June 1984, when it rose 7.7 percent — while raising the number of hours worked just 3.6 percent, the Labor Department said. When farms were added to the equation, the productivity rate for all businesses increased 1.8 percent in the first quarter of 1987 while output rose 5.1 percent and hours worked increased 3.2 percent.

Manufacturing companies recorded a 1.4 percent increase in productivity. Makers of durable goods, items designed to last at least three years, had a 1.6 percent increase while nondurable goods makers saw productivity rise 1.2 percent.

All those percentages are based on seasonally adjusted annual rates, which reflect what a year's performance would be if every three-month period did as well as the first. (CPI. AP) period did as well as the first. (CPI. AP)

Energy Ministers to Meet On Decline in Oil Prices

PARIS — The energy ministers from 21 non-Communist industrialized nations will meet May 11 in Paris to discuss the impact of lower oil prices on the economies of con-sumer nations, officials of the International Energy Agency said

Monday.

The meeting, to he chaired by Canada's energy minister, Marcel Masse, will focus on the economic implications of the steep fall in the prices of oil, natural gas and coal since the IEA ministers last met in Inth 1985 Since the price of oil has July 1985. Since, the price of oil has fallen from about \$27 a barrel to about \$18 a barrel.

Canada Publisher Buys CDA New York Times Service

NEW YORK — International Thomson Organization Ltd., a diversified Canadian publisher, has acquired CDA Investment Technologies, a financial information company based in Silver Spring, Maryland, from Elsevier U.S. Holdings. Terms were not dis-closed.

Fokker Predicts Profit Despite Start-Up Costs

AMSTERDAM - The Dutch aircraft maker Fokker said Monday in its 1986 report that although high development costs would depress 1987 results, it expected a profit in

In March the company reported a 42 percent drop in 1986 profit to 19 million guilders (about \$9.5 million at current rates), from 33 million in 1985. Sales rose slightly in 1986 but guilder income fell because of the lower dollar, which made Fokker vulnerable to U.S. com-

petition, the company said. Fokker said some of the 12 options to buy its F-50 plane, due for first delivery in mid-1987, were likely to be converted into firm orders this year. and noted that there were 91 options to buy its F-100, due for

delivery by the end of the year. The chairman, Frans Swarttouw, said Fokker planned to diversify away from civil planemaking to reduce its dependence on the F-50 and F-100.

Merrill Shuffles Management Of Its Securities Operations

By James Sterngold New York Tunes Service NEW YORK - Merrill Lynch Co. has announced a shake-up in the management of its securities trading, in an effort to recover from last month's loss of \$250 million in

its mortgage-bond trading. Merrill Lynch also said Sunday that it had asked for a review of its trading operations by William P. Rogers, the former U.S. cabinet member who led the government's investigation of the space shuttle explosion, and Irving M. Pollack, a former member of the Securities and Exchange Commission.

In the management shake-up, Daniel P. Tully, Merrill's president, is taking direct control of all securities trading, including the full range of stocks and bonds, "until we are satisfied that the most appropriate trading management structure is in place and sufficient additional controls are established," said William A. Schreyer, Merrill's chairman.

Brian M. Barefoot, the senior trading, was relieved of responsibility for securities trading but remains in charge of sales.

Merrill Lynch Capital Markets, the

management changes were likely. Merrill Lynch, the second largest brokerage on Wall Street, after Shearson Lehman Brothers, announced the losses in its mortgage producing solid results. backed securities trading operaernment National Mortgage Association, or Ginnie Mae, that the firm bought for its own account.

The bonds tumbled in value when interest rates unexpectedly scared last month. About \$800 million of the bonds were purchased in unauthorized trading by a senior official, who was dismissed, the

U.S. Banks Have Weak First Quarter

NEW YORK -- As the year began, the leading U.S. commercial bankers hoped to put the problems of 1986 behind them. Instead, loan losses continued to mount, profits on good loans narrowed further and overhead costs rose at rates well above the level of revenue growth or the pace of inflation.

As a result, 1987's first quarter. rather than representing a turning point, produced only mediocre profits. And now, with three immediate threats to bank earnings the plunging value of the dollar, the rise in interest rates and Brazil's suspension of interest payments on its debt — showing no signs of lifting, the remainder of 1987 could

be equally disappointing.

The decline in the dollar could produce inflation in the United States, cutting the purchasing power of corporate earnings. Rising interest rates will make it harder for borrowers to pay bank debt. And Brazil's suspension has already cut into banks' interest income.

"What bank stocks need is stability in the dollar and some decline in long-term interest rates from levels recently achieved," said Stephen Berman, the banking analyst at County Securities Inc.

No one disputes the severe im-pact last quarter of Brazil's decision to stop paying interest on more than \$60 billion in bank debt. The 15 largest U.S. banks all said they would book no more Brazilian interest than they actually received. Among Brazil's 20 largest U.S. Merrill Lynch Capital Markets, the investment banking, trading and institutional sales arm headed by Jerome P. Kenney.

bank creditors, earnings will be cut by a total of \$875 million if interest payments are not resumed by year-end. That would mean about a 15 Several officials said further percent reduction, on average, in estimated profit for those banks.

This was especially tive, if only because they could protrue at Mellon Bank Corp., which in the first quarter reported its first loss ever after uncovering a passel of bad energy and real estate loans.

At the same time, profits on good loans have been narrowing, a function of the growing oversupply of banks competing for business in metropolitan areas and the continned exodus of large and midsize companies from the banking system to such less expensive financing sources as commercial paper.

Moreover, the big banks' overhead has continued to grow at dou-ble-digit rates. Bankers say the increases are necessary to support expansion. Analysts agree, but they say such costs should still be lower, particularly with today's low inflation rates.

"The results were lackluster." said James J. McDermott, director of research at Keefe, Bruvette, "Even if you adjusted for Brazil. you would see single-digit percentage gains or flat comparisons with

Nilaparvata Lugens. Better known as the brown plant hopper.

It is a common pest in some parts of the world, but not, perhaps, top of your mind. The brown plant hopper, however, recently threatened Indonesia's rice crop by destroying thousands of acres of paddy fields. An event such as this can effect a country's cash flow and borrowing commitments, with a resultant knock-on effect to your business. That is why the new Reuter Country Reports service keeps a careful watch on the hoppers' movements.

With over 1,000 journalists in 106 bureaux in 73 countries, Reuters has the news-gathering resources to spot such details, and recognise their importance.

Reuter Country Reports is an on-line service giving you immediate access to up to the minute news and information, as well as comprehensive background data - country by country,

information are all part of the service. This is the detailed information on the countries you currently do business with, and those countries you might.

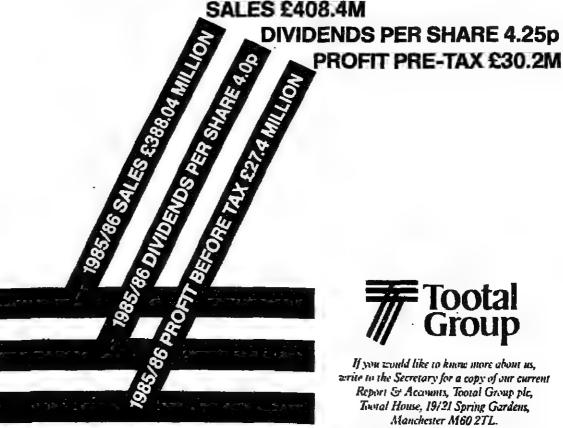

The result is less time wasted in collecting information. It gives you more time to make quicker and more effective business decisions.

Call Janet Schoene, Reuter Country Reports Manager, on 01-250 1122, or post the coupon now for details.

Please send me details of the new Reuter Country Reports service. Post to: Janet Schoene, Reuter Country Reports Manager, Reuters Limited, 85 Fleet Street, London ECIP 4AJ Company

New Language From Brazil's Finance Ministry

By Alan Riding
New York Times Service

New York Times Service

RIO DE JANEIRO — In the week since he became Brazil's finance minister, Luiz Carlos Bresser Pereira has been dropping heavy hints that his style and policies will differ from those of his predecessor, Disson Funaro.

Brazil's trade surplus this year to endorse any austerity program could fall below \$3 billion, but Mr. Bresser Pereira said he was hoping for \$6 billion to \$8 billion.

Foreign bankers have been quick to say concessions to foreign credition to any concessions to foreign credition to so that might cost it votes.

Bresser Pereira said he was hoping for \$6 billion to \$8 billion.

Foreign bankers have been quick to notice the different language will restore our good relations with the international funancial community.

Brazil's trade surplus this year to endorse any austerity program that might cost it votes.

Bresser Pereira said he was hoping for \$6 billion to \$8 billion.

Foreign bankers have been quick to notice the different language among nationalists in the party.

Aware of the political perils of a recession. Mr. Bresser Pereira

for example, that a belt-tightening

man as "good old-fashioned common sense," the fundamental question remains whether he or isser should never be popular."

As if to prove his point, Mr. Bresser Pereira has announced an austerity program involving isometeonomic growth, cutbacks in government spending and further currency devaluations to promote exports. If carried out, he will indeed not be popular.

The new minister apolitations, the new minister appears willing to work out solutions such a rate would be tantamount to recession, but the minister chooses to directly with commercial creditors. "The negotiations will be to call it "austerity."

The party's economic promote confrontation. Nor do they, I think country grow to grow in the medium term and not in the short term."

Yet, many foreign bankers are worried by traditional Brazilian standards such a rate would be tantamount to recession, but the minister chooses to call it "austerity."

"The party's economic growth commercial creditors. "The negotiations will be tough," Mr. Bresser Pereira said last week. "We have no interest in a confrontation. Nor do they, I think that in the end we will reach an agreement."

Yet, many foreign bankers are worried by the commercial creditors. "The party's economic growth to call it "austerity."

"The party's economic growth commercial creditors. "The negotiations. Nor do they, I think country grow to grow in the medium term and not in the short term."

"The party's economic growth to commercial creditors. "The new minister chooses to call it "austerity."

"The party's economic growth to commercial creditors. Will be to call it "austerity."

"The party's economic growth to commercial creditors. Will be to call it "austerity."

"The party's economic growth to call it "austerity."

"The party's economic growth to call it "austerity."

The new minister appears willing to work out solutions with the musterity."

"The party's economic growth to cal

"Popularity is definitely not one of the objectives of this ministry. he said in an interview, taking a swipe at the populist and nationalist approach favored by Mr. Fursaro. "In principle, the finance minister should never be popular."

The party's economic product for the minister approach favored by Mr. Fursaro. "The negotiations will be to call it "austerity."

The party's economic program has a since of this ministry. The party's economic programs have been characterized between Brazil and creditor nations before even initiating formal of 3 to 3.5 percent this year. By traditional Brazilian standards such a rate would be tantamount to directly with commercial creditors. "The negotiations will be to call it "austerity."

The party's economic programs have been characterized by a prominent Brazilian business-man as "good old-fashioned common sense," the fundamental question remains whether he or President José Sarney has the political method of the objective of this ministry.

The negotiations will be to call it "austerity."

The party's economic programs have been characterized by a prominent Brazilian business-man as "good old-fashioned common sense," the fundamental question remains whether he or President José Sarney has the political method of the program of the objective of this ministry.

The negotiations will be to call it "austerity."

The party's economic programs have been characterized by a prominent Brazilian business-man as "good old-fashioned common sense," the fundamental questions will be to call it "austerity."

Nakasone Visit Disappointing,

U.S. Aide Says

WASHINGTON - Last week's visit to Washington by Prime Minister Yasuhiro Nakasone of Japan was a disappointment, a Commerce Department

official said Monday. S. Bruce Smart Jr., an undersecretary of commerce, told the Society of American Business Editors and Writers that he had hoped for Japanese offers of concessions on computer sales. auto parts, agriculture and the

construction of a major airport. Mr. Smart also said, however, that Japan's decision to act on interest rates was a move in the right direction.

He made clear that he thought the Japanese responded as desired to new U.S. duties on certain microchip products. Mr. Smart said a more reasonable period of discussion with Tokyo might now be beginning.

Few Corporate Issues Are Expected During U.S. Refunding

NEW YORK - Many U.S. corporate treasurers will be reluctant to enter the fray this week as the Treasury conducts its \$29 billion quarterly refunding, underwriters say,

"We have not heard of any investment-grade issues that are scheduled for pricing." one underwriter said. "We certainly do not plan any."

Underwriters said recent volatility in the benchmark 712 percent Treasury bonds of 2016. combined with expectations that interest rates would have to rise to lure foreign investors to the refunding, sent investment-grade issuers to

Still, some traders said that companies might issue investment-grade securities, rated Baa-3

after the huge refunding, which starts with Tuesday's sale of \$10 billion in three-year

Investment bankers said junk bonds and convertible debt transactions would probably fill the gap. Those sectors have outperformed investment-grade securities recently.

"Investors are hungry for the high yields that junk bonds offer," an underwriter said. "They feel more comfortable with credit risk right now than with interest rate risk."

Meanwhile, a belief that the stock market will outperform the bond market in the coming weeks should bolster the already buoyant convertible debt sector, traders said.

Convertible subordinated debentures are and higher by Moody's Investors Service Inc., if sort of a hybrid between stock and bonds. They reasurers believe rates will increase sharply are debt securities that pay interest initially but

can be converted into equity, usually common, at a prestated price above a stock's current value.

Because the convertible feature is a sweetener, the issuer can borrow at rates well below those in similar-rated general debt, analysts

Among convertibles held over from last week are a \$20 million issue of 20-year Helen of Troy Corp. paper, rated B-2 by Moody's and Bminus by Standard & Poor's Corp., via Drexel Burnham Lambert Inc., and a \$30 million, 25year issue of Triad Systems Corp., rated B-3 and B-minus, via Smith Barney, Harris Upham

Prudential-Bache, as lead underwriter, said it planned to price this week a \$50 million issue of convertible subordinated debentures, due 2007, of Jones Intercable Inc.

HARLEY: Euphoria of Revitalization's Success Not Shared by Workers

comeback as a company is our people here. They have a lot of skill and craftsmanship and they went through a lot of hardship to get the

company where it is today."

In fighting its way back, Harley-Davidson imposed layoffs that cut the Milwaukee-based company's national payroll from 3,800 in the early 1980s to about 2,200 today.

Much of Harley's comeback is attributed to the use of "quality circies" and other employee-involvement programs, as well as statistical quality control and just-in-time inventory procedures. But just as Gentrade surplus with the United eral Motors Corp. is beginning to

> and electrical maintenance worker, said, for example, that he was "all for" the quality circles used at the York plant when it was in trouble. But now, he said, the quality circles seem to have become a way of keep-

ing the pressure on employees.

Others said that even though their sacrifices beloed to save the company, there seems to be no guarantee that they will not lose jobs. Said Red Bixler: "They can't convince me that the only reason they want to streamline jobs is to reduce production costs. Every time we reduce production costs we also seem to reduce the number of workers."

If Harley-Davidson falls victim to motorcycle imports again, it might not care, Mr. Bixler said. coming from the military. On Monday, the company re-

A SPORT OF NATURE

By Nadine Gordiner. 341 pages, \$18.95. Alfred A. Knopf, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by Miehiko Kakutani

By way of explaining its title, Nadine Gordiner introduces her latest novel with a quote from the Oxford English Dictionary:
"Lusus naturae — Sport of nature. A plant, animal, etc., which exhibits abnormal variation or a departure from the parent stock or type."

The "sport of nature" in Gordiner's new book is a girl named Hillela — a white South African who will grow up to become the wife of a black head of state, a woman renowned for her beauty and political savvy.

Hillela's story quickly takes on the form of an old-fashioned picaresque novel. Many of the plot conventions are familiar. The heroine is born into lowly circumstances or orphaned (Hillela's mother abandous her to run off with a lover); endures a painful, or at best disorganized, childhood and adolescence (Hillels is packed off to live with a wealthy, style-conacious aunt named Olga, then a liberal, politi-cally active aunt named Pauline); gets herself into trouble (Hillela has an affair with her cousin), and subsequently sets off to make her fortune in the world.

Although the heroine is often described as innocent, she is also sexually magnetic (Hillela "drew upon the surety of her sexuality as the bread of her being"), and she quickly learns to

use her beauty and her charm to ensure her survival — and later, to further her ambitions. Various benefactors, sugar-daddies and lovers conveniently appear and disappear as needed — and in the process, money, status and a sentimental education are acquired.

In Hillela's case, she leaves her surrogate parents and takes up with a sometime journalist named Rey. She flees South Africa with Fast and joins an exile community on the East African coast. After his departure, she takes up with other people he has betrayed, and in time becomes the misuress of a well-known ambas-

Her next conquest is Whaila Kgomani. a prominent black intellectual and revolutionary, who seems destined to play a large role in the continent's changing political configura-tions. The two marry and have a baby, whom they name "after Nelson Mandela's wife; Nomzamo." When Whails is killed - allegedly by agents of the South African government

Hillela takes up his cause, becoming a

prominent activist in her own right. There are other liaisons, and finally a marriage to another black leader - known first as the General and later as the President.

In the course of all these melodramatic events. Hillela remains curiously opaque — as though glimpsed through a badly focused telephoto lens. Do her numerous affairs represent an unconscious desire to emulate her wayward mother? Or are they merely an expression of her passionate nature? Is it a coincidence that she marries two black men — or are such liaisons a means of rebelling against her identi-ty as a white South African, or perhaps an expression of political solidarity with the revo-lutionary cause? Do her political activities undertaken as Whaila's widow and as the President's wife - attest to a real ideological commitment? Or are they simply side effects of her involvements with these men?

There are some closely observed and beautifully rendered scenes in "A Sport of Nature," but in the end, the novel lacks the moral density of the author's finest fiction. Indeed, the book's glib encapsulation of recent history. combined with its tentative flailings in the direction of the family saga (before its close, Hillela has had a reamon with her long-lost mother, and seen her daughter become a world-famous fashion model), leave the reader feeling diverted, rather than genuinely moved

Warriors Oust Jazz; **Pistons** Nip Hawks

SALT LAKE CITY - A playoff record that had stood for 31 years ended Sunday,

The opening round of the National Basketball Association playoffs concluded with the Golden

NBA PLAYOFFS

State Warriors topping the Utah Jazz, 118-113, to advance to the Western Conference semifinals against the Los Angeles Lakers. Meanwhile, in an Eastern Con-

ference semifinal opener, the Detroit Pistons stole the home-court advantage by edging the Atlanta Hawks.

The Warriors, who are making their first playoff appearance in 10 years, became the first team since the 1956 Fort Wayne Pistons to trail by 0-2 and win a best-of-five series. There were no five-game playoffs in the NBA between 1968 and 1983.

We came back after being down 0-2 and we're really excited about this win," said center Joe Barry Carroll, who finished with 24 points. "All year we've felt like we could play better and now we're

finally playing like we're capable."

Karl Malone scored 23 points to lead Utab, while Darrell Griffith and Thurl Bailey each added 19. Eric Floyd scored 21 points for Golden State and Greg Ballard talfied 11 of his 18 points in the third

The Jazz, trailing by 22 in the third period, closed to 114-111 when Mark Eaton scored from underneath and added a free throw one minute later when he was fouled by Chris Mullin with 39 seconds left in the game.

Larry Smith put the Warriors ahead, 116-111, when he tipped in a rebound and Floyd stole Kelly Tripucka's in-bounds pass with 17 seconds remaining to spoil Utah's comeback Purvis Short hit two free throws

with 11 seconds left before Griffith completed the scoring with 0:04 to Pistons 112, Hawks 111: In At-

lanta, Isiah Thomas scored 30 points, including the deciding free bound attempt as the time expired. scored from inside and Kevin Wilthrow with 16 seconds remaining. Atlanta had a chance in the final two free throws with 3:23 left for a 1:26 to play. failed on a 15-footer (4.57 meters) 107-100 lead, but Tree Rollins hit Thomas hit a 20-footer from the ers hit one of two free throws to tie and Randy Wittman missed a refour straight free throws, Wilkins top of the key with 1:02 left; An-

Erving of 76ers Makes a Graceful Exit

MILWAUKEE - Inlins Erving held the ball high above his head as he had so many times during a glorious 16-year career in professional basketball.

But this time he wasn't cruising in for a dunk or a gliding finger roll to the basket. He was walking off the court for the final time as a member of the Philadelphia 76ers, and he was saluting the fans as they cheered him one last time.

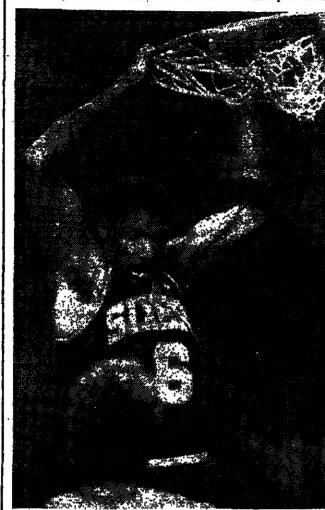

"I was thinking about my teammates, my family, the fans, a sigh of relief," Erving said after the 76crs were eliminated Sunday by the Milwaukee Bucks in

the first round of the National Basketball Association playoffs. "I wish in my heart I could be

happy," he said, "Losses always hurt. I never learned to take losing in stride. Even though my facade may seem that way, it always hurts. There's always a place inside that's troubled with a loss of any kind."

In his final game, Erving played 40 minutes and led the 76ers with 24 points. He left the game with 40 seconds to go as a schout Milwaukee Arena stood and cheered one of the game's greatest players.

Milwankee guard John Lucas went to the Philadelphia bench

Julius Erving on Sunday: "I have nothing to be sad about."

and embraced Erving. "Doc beloed me a lot," Lucas said. "! just wanted to let him know that, whether he knows it or not, he's helped a lot of people. He's been an ambassador for his sport."

Erving was only the third player in NBA history to score more than 30,000 points and was selected for all-star game in all of his 11 NBA seasons.

But his final game was destined to be a loss - unless the 76ers could capture a championship as they did in 1982-83. "Even though it was a disappointing finish, we're still leaving with a oneness. It's not that men can't cry but this was not a tearjerker situation," Erving said af-

ter the 102-89 defeat. "I feel relieved. It was a great career, a very productive career. People were wonderful to me. I have nothing to be sad about,"

"I think the traditional thing to do is salute the winners," he said, "and to regroup and think about the offseason. For me, it's going to be the longest one I've

Teammate Maurice Cheeks said, "I remember when I first came to training camp, the way he was treated and how special he was. So it's sad to see him, realizing that this was his last game." Coach Matt Guokas said the

76ers were trying not to look at the possibility of Erving playing his final game.

"Nobody was thinking in those terms," he said. "All we wanted to do was keep on winning. However, it was the end of a tremendous career. He had 16 incredible years of professional basketball."

With sobbing relatives at his side, Erving said he would savor what he had accomplished and not live in the past. "Twe had enough time and enough people important to me to get a hold of my heart and my mind, so you don't have to worry about the desert-island syndrome creeping

"Looking back, I won't have to be haunted by a miscue or a mental or strategic error. It's time to look at the big picture. Baskethall

The Pistons seemed to have the lis hit a short book in an 8-2 run game in hand when Thomas sank that cut the deficit to 109-108 with steal with 0:33 to go, and Doc Riv-

major-league appearance: He rethat's not easy to do. Davis hit three home runs, in-

cluding his second grand slam in shot off Schatzeder in the sixth. three days, and drove in six runs to victory over the Philadelphia Phillies here Sunday.

Two weekends earlier, Davis had against the Houston Astros. "He's becoming more of a pol-

should at least earn him a third learning to put the ball in play. He's got tremendous bat speed."

Davis hit a bases-empty homer off starter Kevin Gross in the third tired Eric Davis, and these days inning the third grand slam of his zeder and another bases-empty

"I saw the ball good and had

career in the fourth off Dan Schat-

(UPI, AP) Eric Davis, watching the flight of his fourth-inning grand slam.

PHILADELPHIA - Wally Rit. Pete Rose said of Davis, who is in chie with two on in the eighth. "I chie did something in his second his second full season in the majors. was just trying to get him out," said major-league appearance that "He's a young player and he's Ritchie, a 21-year-old left-hander. "I threw a couple of changes and

then got the fastball by him." Bill Gullickson earned the victory despite giving up nine hits and six runs in 5% innings. Gullickson and Kal Daniels homered off Gross in the third as Cincinnati took a +0 lead.

Davis became the first Cincinnati player to drive in six runs in a game since Cesar Cedeno did it against San Francisco June 16. 1982. Davis had hit two home runs. Friday night.

"He had about a good a series as you will ever see a player have," said John Felske, the Phillie Manager. "We tried to get the ball in on him, but he's hot."

Expos 2, Mets 0: In New York, Tim Raines hit his second gamewinning homer in as many 1987 appearances, giving Montreal a split of a four-game series. With two out in the first inning. Raines sent the first pitch from Bob Ojeda, into the left-field bullpen. Raines, who went 4-for-5 with a game-winning grand slam Saturday, had one hit in four at-bats in his second game since resigning with Montreal.

Cubs 4, Padres 2: In Chicago, with his a home run and a double. and Leon Durham added two RBIs. to give the Cubs their ninth victory in their last 12 games. San Diego, which has lost five straight. dropped to 6-20, the worst record who won only five games last sea-son, improved to 4-2.

Braves 5, Astros 3: In Atlanta, Ken Oberkfell and Ken Griffey

drove in two runs apiece, putting the Braves past Houston. Winner Zane Smith allowed seven hits in 7½ innings, while Jeff Dedmon got the final five outs.

Twins 4, Yankees 3: In the American League, in Minneapolis,

Kirby Puckett's seventh homer of the year broke a 3-3 tie in the eighth and lifted Minnesota over New York, Rickey Henderson stole four bases, tying the Yankee single-game record accomplished nine Puts Wings in other times. Henderson is 12-for-12 in steals this season and has at least one in five straight games. Puckett has batted .406 during an eight-game hitting streak and has raised his average to .355.

Blue Jays 3, Rangers 1: In Toronto. Jim Clancy pitched two-hit ball for 815 innings to help the Blue Javs extend their winning streak to six games. Clancy struck out seven and walked two: Tom Henke, giving up an RBI grounder to pinch-

He finally struck out against Rit-chie with two on in the eighth. "I hitless relief for his fifth save of the season. Texas has lost nine straight

on the road. White Sox 4, Orioles 3: In Baltimore, Donnie Hill singled home pinch-runner Steve Lyons with two out in the eighth to give Chicago a three-game series sweep. The Ori-oles lost for the 14th time in their last 18 games. The sweep was Chi-

cago's first in Baltimore since 1966. Royals 2, Indians 1: In Kansas City. Missouri, a four-hitter made Danny Jackson a winner for the first time since last Oct. 1. Jackson, who struck out seven and walked four, held Cleveland hitless until Carmen Castillo doubled leading off the fifth.

Athletics 2, Tigers 0: In Oakland, California, Mike Gallego got his sec-ond game-winning RBI in two days as the Athletics stretched their winning streak to four games. Gallego broke up a scoreless duel between Eric Plunk and Detroit's Eric King on a seventh-inning grounder. Ron Cey opened the inning with a single to center. Stan Javier, pinch-running for Cey, went to third on a single by Mickey Tettleton and scored when Gallego grounded to shortstop Alan Trammell, who threw to second to force Tettleton

Mariners 7, Brewers 3: In Seattle, Alvin Davis drove in two runs Andre Dawson drove in two runs and right-hander Mike Morgan won his second consecutive start since returning from the bullpen. Morgan was shelled in his first three starts of the year.

Angels 11, Red Sox 4: In Anaheim, California, Doug DeCinces in the major leagues. Rick Sutcliffe, hit his first grand slam since 1981 to highlight California's pounding of Boston. John Candelaria posted his eighth straight victory, dating from last Aug. 20. Al Nipper, who gave up five runs on three hits and two walks in 43 innings, absorbed his first defeat in four decisions this season as the Red Sox finished a 2-8 Western swing.

Goalie Hanlon Semis of NHL

DETROIT - A backup goaltender is the main reason the Detroit Red Wings are heading to the Na-

tional Hockey League semifinals. Glen Hanlon recorded his second shutout in three playoff games here Sunday night, lifting the Red Wings to a 3-0 victory over the Toronto Maple Leafs in the deciding game of

the Norris Division final. In the Stanley Cup semifinals for the first time in 21 years, Detroit is the fourth team ever to rally from a 3-I deficit and win a best-of-seven playoff series (the others were Toronto in 1942 and the New York Islanders in 1975 and 1987).

Hanlon replaced Greg Stefan in goal after Toronto took a 2-0 lead in the series and stifled the Leafs. "It's great that we have a second goalie who can come in and per-form the way Glen did," said Steve Yzerman. "Greg was brilliant in the first series and Glen came in

and turned this one around." "I'm playing behind a team that any goalie could live with," said Hanlon, who blanked the Leafs, 3-0. in Game 5. "You have to give credit to the character of the players. We had chances to lose this series, but they didn't let it happen."

The Red Wings are scheduled to begin the Campbell Conference final Tuesday against the Edmonton Oilers. The Wales Conference final between Philadelphia and Montreal was set to open Monday night.

After a first-period goal by Adam Oates, Yzerman and Darren Veitch scored 71 seconds apart in the second period to give Hanlon Pavne Stewart, with a 68, and all the cushion he needed. Yzerman South African David Frost, with a put Detroit ahead, 2-0, on a breakaway at 3:57; Veitch fired a slapshot past Ken Wregget at 5:08.

Toronto had several good scoring chances in the first period, but Hanlon thwarted Wendel Clark, Mike Allison and Russ Courtnall Silver Spur valued at \$118,000 on close-in shots. "Hanlon kept us when his 3-iron shot found the cup for a hole-in-one on the 212-yard Demers. "The miracle that wasn't (AP, UPI) supposed to happen has."

ART BUCHWALD

Camping at the Kremlin

"My name is George Shultz and I'm secretary of state. I would like a

Winnebago, or something like it." "Were you planning a long No, I want to park it outside the U.S. Embassy in Moscow so I

won't be bugged when I'm having a meeting. With the listening in our buildings I feel a mobile home is the only home is the only safe place to conduct Ameri-ca's diplomacy." Buchwald

"Good thinking, sir. How big do you want the trailer to be?" "I would like something practi-cal — a place where I could meet the Soviet foreign minister in the daytime, and sack out at night so I could save on my per diem."

"If you'll forgive me for saying 50, you need something grander. The Kremlin will not take you seriously if you park outside the embassy in a mobile hutch. As the representative of a superpower you should have this luxurious Winnebago which will not only handle a

Florence Has Lost Dante's Remains

F LORENCE — The remains of Dante Alighieri, author of "The Divine Comedy," are missing from two yellowing envelopes in Florence's National Library. The disappearance could date back more than 50 years, museum offi-cials said, revealing the mystery Sunday after a year-long investiga-

The envelopes containing the dusty remains of the 14th century poet and moral philosopher were last put on public display in Florence in 1929.

Officials are working on a theory that they may still be locked in a drawer somewhere in the museum or were displaced either during removal to different premises of the museum in 1935, or following the chaos caused by a 1966 flood.

WASHINGTON — "May I full-blown disarmament confer-help you, sir?" ence, but comes complete with airence, but comes complete with airbags for both sides." "It doesn't look like it holds

many people." "The roof comes out and the back goes down. Believe me if I bad to negotiate the future of the Western World, this is the only vehicle I would use."

"What else do you have?"
"We have had a lot of success with this mini-motor home. It's been used several times to work out

a durable peace in the Middle East. What makes this one so special is that it self-destructs when the parnicipants fail to come to an agree-"I was really hoping for some-thing I can tool around in with Mrs.

Shultz to Russian trailer parks." The salesman said, "I just thought of an RV that you might like. It's called the Tara Motor Home and comes air-conditioned with a CB radio. You can talk to anyone in Washington without leaving your bunk."

"Suppose somebody in Moscow overhears me?" "They can't. Anyone who listens in on you would be violating Soviet

"I have to be sure my van is completely bug-proof." "I guarantee a quiet ride from Omsk to Murmansk."

"Is your Winnebago large

enough to have a summit meet-ing?" can sleep the Reagans in the front and the Gorbachevs in the back. and still have room to invite 60 people for a state dinner. With this innebago we're talking top-ofthe-line summitry."

"You make a very convincing case. I think I'll take it. What's the warranty on it?"

"We give the State Departmen the same warranty on our vehicles that it gives the public on its trea-

"I warn you, if it's not safe I'm going to bring it back."
"If you're not happy with the Winnebago I have a wonderful alternative for you. It's a Good Humor truck. All you have to do is wear a white hat, white shirt, a black bow tie, and you'll have the Russians eating out of your hand."

Carly Simon's **Self-Portrait**

By Stephen Holden
New York Times Service NEW YORK - "Coming Around Again," the title song of Carly Simon's latest album, embodies everything that

the 41-year-old singer-songwriter does best. This deceptively simple song, written for the movie "Heartburn." distills the film's themes and atmosphere in broad, blunt strokes. Depicting a highpowered, high-strung woman struggling miserably through the rituals of daily life while her marriage is coming apart, its verses paint a concise picture of domestic desperation:

You pay the grocer Fix the toaster Kiss the host goodbye Then you break a window Burn the souffle Scream the hillaby.

The song's chorus, like its verses, is an emotional seesaw teetering between composure and

I know nothing stays the same But if you're willing to play the game It's coming around again

into a bluesy harmonic mode and the lyric knifes around two lines that sting with ironic cynicism: So don't mind if I fall apart There's more room in a broken

heart.

Then suddenly the song shifts

Simon's edgy, open-hearted performance is perfectly in character with the attitude of the song's protagonist. Through subtle shifts of vocal intonation, she acts out all the emotional changes in a lyric that combines fragmentary images of maternal caring, metaphysical bewilderment, rage, wild romantic longing, belplessness, boredom and exhibaration into a portrait of embattled up-per-middle-class domesticity.

"Coming Around Again" is the thematic centerpiece of an album (Arista) that is the latest and one of the strongest chapters in a growing catalogue that seems increasingly like the pop-music equivalent of the diaries of Anaïs

Nin or Erica Jong's autobiographical novels. Each Carly Simon album lays bare a psychological landscape whose outlines are familiar but whose details and perspective change from record to record. With "Coming Around Again." Simon's diaristic ocuvre now covers 16 years. Many love affairs, a marriage, family rela-tionships, friendships, and childhood and adolescent memories have been reflected on, celebrated and rued in a body of work that offers a strikingly candid and instructive self-portrait.

In her songs, Simon has always presented herself nakedly, warts and all -good-looking, affluent, talented, cultivated, charming, generous and loving on the one hand; jealous, insecure, demanding, restless, competitive and selfpitving on the other.

Of all the confessional singersongwriters who emerged out of the 60s counterculture to confide their personal feelings in recorded pop song cycles, she has been one of only a handful to sustain a major-label recording career of such duration. And of that handful, she has stayed the closest to the personal confessional mode, Where other singer-songwriters, such as Joni Mitchell, Paul Simon and Leonard Cohen, have aspired toward a rock-'n'-roll-based poetic art song, Simon has generally kept her musical and lyrical dic-tion within the boundaries of commercial pop-rock. Over the years, her musical vocabulary has changed little. Her characteristic melodies are folk tunes inflected with Broadway and French artsong harmonies and kicked into gear with rock rhythms.

The constantly evolving self-portrait that Simon has delineated is that of a prototypical, highachieving urban baby boomer — liberal, "liberated" and determined to have it all. Her best known song, "You're So Vain," a competitive rejoinder to a narcis- Doesn't mean it isn't perfect sistic ex-lover, remains one of the Can't you see . . . most outspokenly defiant female. It's the stuff that dreams are made

an arrangement that pointedly brings in the theme of "Coming

Around Again." The theme recurs a third time in "Itsy Bitsy Spi-

der," an adaptation of a nursery

Simon's new album carry much the same spirit of sexual challenge as "You're So Vain," the years have somewhat mellowed her brashness. More than any of its predecessors, the new record deals forthrightly with conflicting needs for romantic passion and stable domesticity. In 'The Stuff That Dreams Are Made Of," Simon, contemplating a current relationship, reflects to herself, Just because you don't see shooting

er demands in "Give Me All a revival of Joe Tex's 1964 soul standard, "Hold What You've Got," and a pop-rock rendition of "As Time Goes By" that features Night."
Along with the title tune, the album's most haunting cut is a song of adolescent memory titled "Two Hot Girls (On a Hot Summer Night)" in which the singer remembers competing with a

friend for the attentions of a boy and losing. Blunt, succinct and catchy on the surface, underneath rhyme sung by a children's it is psychologically complex, chorus.

And below the confident gregari-Warring against the songs that ousness of Simon's voice quivers a affirm stability are other songs seam of vulnerability. Simon's special quality is to convey simul-taneously the insecure child and the superwoman she is always on

PEOPLE

Billy Joel Will Present

6 Rock Shows in Russia

Billy Joel will give six concerts in the Soviet Union. The pianist-com-poser-singer will be the first U.S. rock performer to present a fully staged show in the Soviet Union since the two countries signed a cultural exchange agreement in 1985. Joel said he would perform in Moscow July 26, 27 and 29 and in Leningrad Aug. 2, 3 and 5.

. . .

The former opera impresario Sir Rudolf Bing, ill with Alzheimer's disease, and his wife, Carroll, 47, both of whose assets have been frozen in the United States, have been given three months' free lodg-, ing and meals at a luxury motell owned by Peter Bunch, an opera lover. The 85-year-old former gen-eral manager of the New York Metropolitan Opera and his wife moved to the Cottage Motel in Mirfield, England, from a boarding house in a rundown section o Leeds. Others have also stepped in to help relieve the financial plight of the Bings, who were married Jan. 9. They were taken to see Kiri Te Kanawa perform in Sheffield on Friday night. On Wednesday, they will be guests at "La Traviata" at the Grand Theatre in Leeds.

Lee Jacocca, the Chrysler Corp. chairman, and his wife, Peggy, ap-peared together publicly in New York for the first time this year in an apparent effort to reconcile their marriage. They were among 250 guests at a reopening party for the 21 Club in Manhattan. "They were sitting shoulder-to-shoulder," said the author Gay Talese, who attended the outing. The couple has been estranged since Dec. 30, when iacocca, 62, filed a divorce suit against his wife of eight months, citing irreconcilable differences.

Photograph albums compiled by the family of Russia's last two emperors, Alexander III and his son Nicholas II, fetched as much as five times their expected sale prices at a Sotheby's auction in London. Neither the seller nor the buyers of the albums were identified. Three personal photograph albums that once belonged to Grand Duchess Olga Alexandrovna, the youngest and favorite daughter of Alexander III., sold for £37,400 (about \$60,000) compared to the catalogue estimate of £10,000-£15,000.
